

## **Ergon Limited – Service Description**

### **Business Analysis – moving to the cloud**

#### **Service Description –**

Business analysis is key to supporting cloud transformation and migration from legacy. We help you evaluate, re-define where necessary, and verify your business needs (functional and non-functional) ensuring operational and user needs are incorporated into the design of robust and easily managed digital services. Business change needs are understood and planned, and we then support technical and solution implementation, and on-going service iteration.

#### **Service features -**

- Identification of key stakeholders and systems to establish baseline position
- Definition of clear and actionable business objectives and user needs
- Identification of cloud transition scope to determine future business change
- Detailed requirements analysis, specification and planning the case for change
- Cost/benefit analysis on features and cloud products
- Aligns cloud adoption to strategic roadmap
- Training needs analysis, business readiness and organisational change gap analysis
- Deep experience in UK Government Cloud transition projects
- Specialist teams to support cloud transition and transformation activities
- Supports technical and solution implementation, and on-going service iteration

#### **Service benefits -**

- De-risks cloud adoption and migration programme delivery
- Guarantees alignment to current Government policies and required approaches
