

## DevOps Testing Service

**Edge Testing Solutions Ltd trading as Resillion's DevOps Testing Service** is aligned to modern, agile approaches to software development using multi-skilled teams. Effective agile working benefits greatly from 'T-shaped people' who combine both a broad capability across the full range of development skills (analysis, design, coding and testing) with deep knowledge of one or more specialisms. Our consultants have a broad range of development experience combined with specific skills in quality and testing. Working as an integral part of your development team we leverage our expertise across all your team members.

Engagements range from acting as a quality champion within a wider development community, implementing Test Driven Development and Behaviour Driven Development techniques, through to implementing specific testing tools such as Selenium, Jenkins, Cucumber or commercial products such as Agile Accelerator.

Features:	Benefits:
<ul style="list-style-type: none"><li>• Focus on supporting a continuous integration approach through to continuous delivery</li><li>• Practical guidance on building quality into your agile/lean development</li><li>• Identify the best-fit portfolio of tools or your development context, including consideration of freeware products</li><li>• Key SDET (Software Development Engineer in Test) resources or wider teams of agile quality engineers</li><li>• Scalable, responsive service built upon agile principles</li><li>• Compatible with the full range of agile methods including XP, Scrum, Kanban, DSDM and others</li><li>• Expert testing consultants with a wide range of complementary development skills</li></ul>	<ul style="list-style-type: none"><li>• Accelerate time to market</li><li>• Practical guidance on improving agile outcomes</li><li>• Impartial expert advice choosing the right tools</li><li>• Bringing a quality-focus to your agile teams</li><li>• Widening the scope of quality to cover hard to test aspects like performance and security</li><li>• Complete ownership of delivery, accountable to the business</li><li>• Right-weight approaches combining agility with necessary rigour</li><li>• Embedded quality to quickly identify how your agile products are meeting real user needs</li><li>• Implementing the most effective and efficient use of chosen toolset</li></ul>
