

## Functional Testing

**Edge Testing Solutions Ltd trading as Resillion's** Functional Testing Service provides our clients with a fully managed on demand end-to-end service. We work with our clients to identify and prioritise functional test scenarios and how best to test them. We support all functional test phases including SIT and UAT based test activities. We flexibly support strategy, planning, preparation, execution and reporting activities from a functional perspective. Our testing experts work with both the clients IT and Business communities to strategise and plan out the testing of all functional coverage be this new greenfield functionality or ongoing releases or sprints of updated existing functionality.

We proactively align a risk-based approach where this is beneficial and provide both onsite and offsite test preparation and execution to satisfy the functions under test. A full reporting process underpins the overall test process and we can align ourselves to the clients defect mechanism or utilise one of our own.

Features:	Benefits:
<ul style="list-style-type: none"> <li>▪ Validate and measure quality of the</li> <li>▪ Support for all functional driven testing including Regression, SIT and UAT</li> <li>▪ Provision of functional test documentation (strategy, plan)</li> <li>▪ Risk based approach</li> <li>▪ On-demand testing services</li> <li>▪ Production of an updated knowledge base for your business flow</li> <li>▪ Creation and execution of functional test scenarios</li> <li>▪ Functional test coverage matrix.</li> <li>▪ Progress reporting</li> <li>▪ Full test management including reporting of defects</li> <li>▪ Traceability back to original business requirements</li> <li>▪ Supporting users during execution, including production of guides and documentation</li> <li>▪ Supports cloud and non-cloud environments.</li> </ul>	<ul style="list-style-type: none"> <li>▪ Improved structure and / or transparency of existing functional activities</li> <li>▪ Overcoming resource constraints to support functional test activities</li> <li>▪ Retain business knowledge your organisation would draw upon for functional testing</li> <li>▪ Addresses gaps many businesses have between user and test knowledge</li> <li>▪ Risk based approach provides flexibility for changing business/project needs/timescales</li> <li>▪ Available on-demand through the Cloud as appropriate thus reducing strain on teams.</li> </ul>

### Pricing

The pricing model adopted for each engagement is based on the specific project requirements and can be delivered on either a time and materials or fixed price basis. Please see the attached Pricing document.

## About Resillion

Resillion is a global quality engineering and cyber security partner from initiation to launch, with best-in-class technologies, leading solutions, and industry recognised services to support our clients throughout the digital lifecycle. By leveraging the latest technologies, an innovation-first mindset, and industry best practice, we are advocates for staying ahead of the competition and achieving strategic objectives.

The company delivers end-to-end solutions to support clients throughout their strategic digital initiatives offering a holistic offering across software and hardware.

Thanks to an invaluable pedigree across multiple different industries, we are proud to partner with leading brands to resolve issues and provide quality driven outcomes. We empower our clients from the world's leading organisations within the Public Sector, Media, Energy, Healthcare, Finance, and B2C industries amongst others, to deliver measurable business value and unleash their full potential.
