

Cloud consultancy and support services from NVT Group technologists.

NVT Group provides consultancy services to its clients which enable them to migrate to the cloud, be that Public, Private or Hybrid cloud. We also provide clients with support services for cloud migration and ongoing tenancy.

Features.

- Agile, responsive and effective support services from NVT Group
- Design, Implement, Test & Support our clients on-premise/hosted
- Reactive and proactive support
- UK based support and consultancy team

Tapping into three decades of experience.

NVT Group has provided infrastructure consultancy services to its clients for over 35 years. The knowledge we have accrued during this period is second to none and this blends with our understanding of client needs to achieve exceptional results.

Qualified in data centre technologies.

Our engineers are Microsoft accredited. We are also a Microsoft Partner and thus have the necessary skills to support our clients across on-premise and data centre infrastructures.

We provide our clients with proactive and reactive support models. This can either be an outsourced support solution across the full network or a support contract which allows the client to utilise our expertise as and when required.

Benefits.

- Allows for better support decisions, more quickly, more often
- Reduce risk, reduce downtime, reduce cost
- Increase productivity, increase efficiency, increase profit
- Local support for UK customers
