Enterprise Architecture Services

Service Description:

KPMG's range of architecture services spans the architecture lifecycle. We can Review, support and develop your organisation's Enterprise and Architecture capabilities, develop architectural principles, ensure solutions are aligned to key business. Finally, we support all the phases from design to delivery of business and technology solutions conformant with EA principles. KPMG can deliver on these aims using proven methodologies built from our experience working globally with 100's of C-suite , IT decision makers and experienced consultants with expertise across a range of domains.

What are the benefits of KPMG Powered IT service?

- Validated and common "picture" of the enterprise, allowing faster decisions and transition state planning
- Enablement of strategy-driven IT/project investments for moving to cloud platforms and services
- Faster solution design due to reuse of common architecture views and artefacts (e.g.,reference architectures)
- Capability-focused and manageable change of the organisation
- Efficiency increases/cost savings in all architectural areas; overview of program portfolio in relation to strategy alignment, architecture development, and implementation status
- Establishment and enablement of an in-house architecture group that carries the benefits forward.

Our service features

- Identify where technology based solutions can benefit the line of business services and applications
- Clarify the impact of business goals and visions on current operations
- Align solution designs with business and IT strategy
- Establish common business and IT blueprints
- Create an investment plan and roadmap of initiatives and projects
- Govern and monitor the transformation of the business and realisation of intended benefits

Our Approach

KPMG proposes a well-defined approach that will assist in delivering a customized solution that meets your requirement. Using our EA maturity Assessment framework, industry experience and methodologies we will accelerate your journey to have a well defined, matured EA framework which is inline with your Business, Data, Application, Technical and Security Strategies.

Requirements

- Workshops engagement.
- Fully answered Current state assessment.
- Clear description of Business, Data, Security, Application and Technology strategy.

Activities

KPMG leverage a six-step process when working with our Enterprise Architecture clients.

- Design digital architectures and platforms that enable the business to be nimble in the
- face of change
- Review, support and develop your organisation's Enterprise Architecture capabilities (including stakeholder communications and your value proposition).
- Align you closer to the business to develop more effective principles, deliverables and
- guidance that's readily adopted.
- Support design and delivery of business and technology solutions conformant with EA principles.

Outcomes

- Digital business value creation demands a flexible, scalable architecture that is governed in short cycles, through partnership with the business and increases the speed of return of investment through constant, smaller, iterative system changes.

High-Level Timelines

Our indicative timeline is based on our experience of delivering similar engagements for multiple organisations. Once engaged, we will work with you to create and agree a bespoke plan to meet your specified requirements.

Weeks: 3

Why KPMG

Top Professional Brand

We have robust methodologies. We are focused on customer needs and have a pragmatic approach for the design and delivery of our Projects. Our team has a proven track record in delivering similar engagements and an intimate knowledge of challenges faced by our clients. KPMG has a strong brand and excellent reputation.

Constructive input and challenge

We consider it to be our responsibility to bring an independent perspective and constructively challenge existing processes and systems. We will highlight and share with you both internal and external leading practice

We employ a collaborative, integrated team approach

We deliver a full suite of recommendations, in collaboration with KPMG sector and technical experts in all parts of our business around the globe. By working in multi-disciplinary teams, we deliver holistic thinking and insights to even the most complex challenges.

We have strong relevant recent credentials

We have worked across multiple industries and will bring insight from other sectors to challenge your thinking. We have vast Cloud & DevOps expertise around UK region alone within our technology practice who cover everything from hosting strategy to building landing zones. We produce agile, resilient and efficient IT functions that support the wider enterprise
