Our Approach

In deploying Intune for modern desktop and device management, we focus on securing and managing corporate devices with policies that enhance productivity while safeguarding data. This approach involves streamlining device enrolment, automating updates, and ensuring compliance across mobile and desktop environments, supporting a flexible and secure workforce.

Requirements

- Implementing Intune for modern desktop and device management requires a comprehensive strategy that encompasses device enrolment, security policy enforcement, application management, and user support. Essential considerations include ensuring compatibility with various device types, aligning with corporate security policies, and enabling remote management and troubleshooting capabilities.

Activities

Device & Application Inventory

- Conduct an inventory to understand the current landscape of devices and applications.
- Identify device types and OSs to establish management baselines.
- Assess application usage to determine management and deployment strategies.

Policy & Security Config

- Develop and implement security policies that comply with organisational standards.
- Configure device compliance policies and conditional access settings to secure devices and data.
- Establish secure application deployment and update protocols..

Enrolment & Deployment

- Set up automated device enrolment processes for seamless device integration.
- Deploy Intune across compatible devices, ensuring minimal disruption to users.
- Manage and monitor application installations and updates remotely.

Training & Support Framework

- Develop comprehensive training programs to educate IT staff and end-users.
- Establish a support framework to address deployment issues and user queries.
- Implement feedback mechanisms to continuously improve management practices.

Outcomes

- Intune's deployment revolutionises desktop and device management by enabling secure and scalable management solutions that enhance organisational agility and security. It simplifies the administration of a diverse device ecosystem, ensures compliance across devices, and supports a mobile workforce with secure access to corporate resources from any location, fostering improved productivity and operational efficiency.

High-Level Timelines
