1 Pricing Note

All of our services in G-Cloud catalogue have an element of agility and flexibility in terms of scope based on the environment, infrastructure, skills and desired outcomes. As such, an initial scoping and discovery activity will be undertaken to determine all the components and resource profile required and estimated pricing for any given requirement.

The price will be calculated based upon the total consultancy effort required, as calculated using our SFIA card, along with the cloud component cost (if applicable as shown below).
