

Pricing: Information Security Assessment and Testing

G Cloud 13

Issued by: Grove Information Systems Ltd

Information Security Assessment and Testing Pricing:

Pricing is calculated on a time and cost basis, assessed case by case. The minimum hourly rate is £150.00 + VAT. The more complex the matter and the higher the scale of the operation, the greater the cost. Conversely, the simpler the matter and the fewer in number the devices, the lower the cost. For example, a full analysis and report on a single electronic device is likely to be in the region of £3,000.00.
