VIABLE DATA

Release Management

Viable Data has a wealth of release management experience, ensuring smooth and efficient software deployments. With expertise in coordinating development, testing, and deployment processes, we minimise downtime and maximise the reliability of software releases. We aim to streamline release cycles and optimise software delivery pipelines.

Release Management

Features

- Release planning and scheduling.
- Version control and change tracking.
- Environment management for testing and staging.
- Automated deployment processes.
- Automated Rollback capabilities for failed deployments.
- Integration with CI/CD pipelines.
- Compliance tracking and reporting.
- Configuration management for consistency.
- Release documentation and communication.
- Post-release monitoring and feedback collection.

Benefits

- Reduced downtime during software deployments.
- Increased reliability of software releases.
- Improved coordination between development and operations teams.
- Faster time-to-market for new features and updates.
- Enhanced visibility into release processes and progress.
- Minimized risk of errors and deployment failures.
- Better utilization of resources and infrastructure.
- Consistent and predictable release schedules.
- Improved customer satisfaction with stable and timely releases.
- Facilitated compliance with regulatory requirements and industry standards.
