Probation Service

Why Us?

When I was programme manager, delivering at various clients I saw common patterns.

- Innovation efforts regularly falter; digital transformation often fails to deliver. Finding, retaining, and developing in-house talent is not getting easier. In fact, the digital skills gap is **widening**.
- Consultancies were missing the new market needs of design thinking, digital transformation, User-centered designing, customer experience, and product innovation and providing relatively junior people at enormous rates
- Delays as the teams were plodding through three phases of existence – storming, norming and forming – before arriving at the holy land of performing

In short, the partnering approach was missing that work with the client to advise and **guide, deliver services/products at pace, build** and deliver, **teach**, and upskill.

It's from this ambition that Scrumconnect Consulting was born.

Our secret sauce: hand-picked hyper-productive teams for a specific project/product/service to help clients deliver projects at pace. We do the hard work in hiring talented individuals, create an environment for them to thrive and deliver value to clients.

Our Why: We Co-Create with our clients to create good services that positively improve people's lives by delivering quality product/service and quickly moving from idea to cash/savings

What: We are a collective of talented consultants who are all here for the same reason: to deliver valuable outcomes.

- A key differentiator is that all our consultants have 10+ years of experience in the delivery and maintenance of digital services, using agile methods.
- We hand-pick the best individuals for a specific project with benefits of building high-performing teams quickly & effectively, quick ramp-up and delivering key roadmap projects at pace.
- Our focus on senior talent means we are able to focus on work that adds real value and to operate with lower overheads.
