

Streamline your Microsoft 365 licenses

Managing your Microsoft 365 software licenses efficiently is crucial for maximising your investments.

Tiger Lens is designed to help you streamline your software asset management; eliminate wastage from unassigned or inactive licences, ensure successful licence rollout and adoption, and optimise licence usage.

Key benefits

- **Comprehensive licence usage analysis**
Tiger Lens reviews your Microsoft license subscriptions quickly and easily, provides visibility on license utilisation and actionable recommendations.
- **Immediate cost savings**
Tiger Lens offers quick insights into potential savings, helping to reduce operational costs.
- **Measurable results**
See clear, tangible outcomes quickly. The one-click operation of Tiger Lens facilitates ongoing best practices in licence management leading to sustained optimal results.
- **Operational efficiency through optimisation**
Tiger Lens will offer recommendations to align licence allocation and usage with the most suitable licence options, creating opportunities for operational efficiencies.
- **Simplified licence management**
Tiger Lens simplifies the manual, labour-intensive process of checking existing licences, which requires extensive knowledge of Microsoft 365 licenses available, and optimises in the fastest time possible.
- **Enhanced joiner, mover, and leaver process**
Tiger lens provides clear visibility on Microsoft license information, enabling an improved joiner, mover, leaver process. This helps streamline organisational changes, and simplifies managing personnel changes.

Solving common challenges

Optimising Microsoft license usage

Problem: Lack of clear visibility on Microsoft license utilisation.

Solution: Tiger Lens provides detailed usage analytics, aligning licence types with actual usage patterns to maximise benefits and reduce costs.

Managing licences effectively and reducing operational costs

Problem: Continuous need for cost savings, and reducing spend on redundant licences.

Solution: Tiger Lens highlights potential savings through optimised licence management and ongoing maintenance, helping you quickly identify and reducing wastage and cost from unassigned and inactive licences.

Tracking extensive Microsoft License information

Problem: Difficulty in tracking frequent changes in Microsoft license information.

Solution: Tiger Lens offers intuitive dashboards for quick assessment and actionable insights. It simplifies the manual, labour-intensive process of checking existing licences, which requires extensive knowledge of Microsoft 365 and its multitude of licences.

Manage organisational changes

Problem: Large organisations with regular staff turnover, or companies involved in acquisition activities, find it challenging to manage the manual joiner, mover and leaver (JML) processes effectively.

Solution: Tiger Lens provides clear visibility on Microsoft licence information, enabling an improved JML process.

Driving informed decisions

Strategic decision making

Use Tiger Lens to gain clear insights quickly, and make informed decisions for the management of your Microsoft 365 subscriptions.

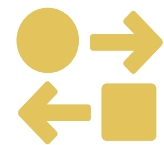

Financial efficiency

Achieve quick and sustained cost savings by eliminating wastage and optimising licence allocation and usage.

Optimised licence management

Simplify and streamline the complex process of licence management, ensuring optimal use of your Microsoft 365 subscriptions.

Repeatable value

Benefit from ongoing, measurable results through continuous optimisation and best practices in licence management.
