

Preventx.  sh.uk

Innovating Online Sexual Health

The only fully integrated, customisable, e-sexual and reproductive health service

Certificate No: 491302025

About SH.UK

SH.UK is the only fully integrated, customisable, e-sexual and reproductive health service that works in partnership with the NHS and other healthcare providers.

Our services include

- Web-portal for user ordering
- Cloud-based secure clinical record system
- Integrated laboratory providing a wide range of STI screening services
- STI treatment for chlamydia, genital warts and genital herpes
- Contraception prescribing and online condom distribution
- Fully integrated digital PrEP service
- SmartKits for use in different settings

Service features

No mobilisation costs

There are no mobilisation or other hidden costs required to implement any of the SH.UK services.

Customisable service design

SH.UK is the only fully integrated e-sexual health service that enables partners to choose between using their own clinical support, or have it provided by SH.UK's CQC registered, consultant led clinical partner. The service includes a web-portal for user ordering, cloud based clinical record system, treatment and contraception prescribing all supported by the SH.UK cloud-based service portal.

Laboratory services

ISO 15189-accredited laboratory services in-house providing DaaS (Diagnostics as a Service). This creates streamlined process flows, improved quality and reduced turnaround times. The Preventx Laboratory is accredited by the United Kingdom Accreditation Service to international ISO standards and adheres to strict quality system requirements.

RPR Syphilis and Hep B immunity tests

SH.UK are one of the only suppliers that can provide RPR tests (for known prior syphilis affected users) and tests to determine hepatitis B immunity status if required as part of a customer's screening profile.

NHS clinical support

SH.UK can provide access to NHS sexual and reproductive health clinicians to deliver clinical support for any of our services. Partners who prefer to retain the insight and expertise of their own local clinical teams can be upskilled by the SH.UK team to use our web-portal to manage clinical support.

Safeguarding

SH.UK has a robust safeguarding process which when utilised in the Preventx SHL service, has the highest percentage of successfully contacted 16-17 years olds against comparable services. Safeguarding calls can be managed by SH.UK, or the partner's own designated clinical team.

UK pharmacy network

SH.UK has a network of UK pharmacy partners it works with to deliver safe, remote prescribing of contraceptives and STI treatments. All pharmacy partners are registered with the appropriate regulators and work within SH.UK's service level agreements. Working within a network in this way gives SH.UK a wide geographic spread across the UK, making it quicker and easier for those service users who prefer to collect their own prescription.

Reporting tools

Secure web-based reporting hub for reporting/ live service information. The data rich nature of the SH.UK service allows generation of a wide range of reporting tools. These include reports on overall testing data, geographic breakdowns, demographic breakdowns, financials, repeat patient data, and the flexibility to develop custom reports which can be accessed 'live'.

Local branding

The service can carry local branding for greater integration with other clinical record systems. The Preventx cloud based clinical record system can integrate with the Idox/ Lillie clinical record system.

Testing kit components

Testing kit component	Infection testing capability	Abbreviation
Pharyngeal / Oral Swab	Chlamydia and Gonorrhoea	P
Urine	Chlamydia and Gonorrhoea	U
Vaginal Swab	Chlamydia, Gonorrhoea, <i>Trichomonas vaginalis</i> and <i>Mycoplasma genitalium</i>	V

B	HIV, Syphilis, Hepatitis B, Hepatitis C, Syphilis TPHA confirmation, Syphilis RPR & Hepatitis B immunity	P1a, T7 or T6	£6.75

SH.UK SmartKit dispatch

Supplied in bulk and delivered directly to clinics/ screening venues. A delivery charge of £8.49 is applied per order to a single address (not per carton ordered).

SmartKits A, B and C are supplied in a carton size of 36, with SmartKit D supplied in a carton size of 18. Once a SmartKit order has been placed via the online system by a service user an additional charge of £1.50 is applied.

SH.UK SmartKit Type	Testing kit components	Infections capable of testing for	SHHAPT / tariff code	Cost
SH.UK SmartKit Type A	U or V	Chlamydia and/or Gonorrhoea from a single sample site	T1 or T2	£4.75
SH.UK SmartKit Type B	U or B	Chlamydia and/or Gonorrhoea from a single sample site and HIV, Syphilis, Hepatitis B, Hepatitis C, Syphilis TPHA confirmation and/or Hepatitis B immunity	T4 or T6	£5.25
SH.UK SmartKit Type C	V or B	Chlamydia and/or Gonorrhoea from a single sample site and HIV, Syphilis, Hepatitis B, Hepatitis C, Syphilis TPHA confirmation and/or Hepatitis B immunity	T4 or T6	£5.25
SH.UK SmartKit Type D	V or U + P + R + B	Chlamydia and/or Gonorrhoea from three sample sites and HIV, Syphilis, Hepatitis B, Hepatitis C, Syphilis TPHA confirmation and/or Hepatitis B immunity	T4/TT or T4/TT/T6	£5.75

Kit returns cost

Customers can choose to upskill their local teams to provide the clinical patient management, or they can choose to outsource this to the SH.UK clinical team.

All prices include access to the SH.UK portal for online ordering, and access to the SH.UK clinical record system for clinical patient management and triage into local clinics.

SHHAPT / tariff code	Infections tested for	Cost using local clinical patient management team	Cost with outsourced clinical patient management to SH.UK
T1	Chlamydia from a single sample site	£17.50	£19.73
T2	Chlamydia and Gonorrhoea from a single sample site	£18.50	£20.73
T2/TT	Chlamydia and Gonorrhoea test from three sample sites	£38.50	£41.43
T4	Chlamydia and Gonorrhoea from a single sample site with HIV and Syphilis	£31.50	£34.53
T4/TT	Chlamydia and Gonorrhoea from three sample sites with HIV and Syphilis	£51.50	£55.23
T4/T6	Chlamydia and Gonorrhoea from a single sample site with HIV, Syphilis, Hep B and Hep C	£49.50	£53.78
T4/T6/TT	Chlamydia and Gonorrhoea from three sample sites with HIV, Syphilis, Hep B and Hep C	£69.50	£74.48
T7	Syphilis and HIV	£21.50	£24.18
T3	Chlamydia and Gonorrhoea from a single sample site with Syphilis	£28.50	£30.73
P1a-HIV	HIV	£18.50	£20.38

Kit returns cost continued

SHHAPT / tariff code	Infections tested for	Cost using local clinical patient management team	Cost with outsourced clinical patient management to SH.UK
N/A	<i>Trichomonas vaginalis</i> from a single sample site	£26	£28.50
N/A	<i>Mycoplasma genitalium</i> from a single sample site	£26	£28.50
N/A	<i>Trichomonas vaginalis</i> and <i>Mycoplasma genitalium</i> from a single sample site	£31	£33.50

Chlamydia treatment

Users can choose to have treatment for simple genital chlamydia infections posted to them at home or can pick up from one of our partners pharmacies under an hour later.

Drug description	Cost
Azithromycin or Doxycycline	£20.30

DoxyPEP

DoxyPEP is the use of the antibiotic doxycycline taken shortly after sex to help reduce the risk of certain bacterial STIs, including chlamydia and syphilis, and has been shown to be effective in clinical trials.

Drug description	Cost
Doxycycline	£28

Digital PrEP

This integrated service enables safe, easy, and rapid access to people who are starting PrEP and already on PrEP. Through the SH.UK PrEP consultation and triage, eligibility can be determined, with those users receiving a remote clinician consultation.

Service users are screened for relevant STIs, offered a bridging prescription, and then provided with a home self-sampling renal function test. Users can then access longer term PrEP prescriptions, with clinical follow up.

Digital PrEP Service Type	Description	Cost
PrEP Start (1 month)	Initial clinical review of user suitability Base-line negative blood results – HIV/Hep B (+Hep C if needed) eGFR Screen (including provision of self-testing kit) Clinical consultation with GP, supplementary safeguarding checks and risk assessment Dispensing and delivery of PrEP medication (1 month)	£80
PrEP Continue (3 months / 6 months)	Initial clinical review of user suitability, including review of eGFR results Base-line negative blood results – HIV/Hep B (+Hep C if needed) eGFR Screen (including provision of self-testing kit) Clinical consultation with GP, supplementary safeguarding checks and risk assessment Dispensing and delivery of PrEP medication (3 months)	£75
PrEP Annual Review	Annual clinical review of user suitability eGFR Screen (including provision of self-testing kit) Clinical consultation with GP, supplementary safeguarding checks and risk assessment Dispensing and delivery of PrEP medication (3 months)	£80

Remote contraception

The SH.UK platform offers a clinically safe way to order routine and emergency contraception with an emphasis on choice and compatibility with a person's medical suitability and lifestyle. Clinical support can be delivered by SH.UK's NHS-led team or by the partner's own designated clinical team.

Customers users may choose to have their medication delivered by post (next day delivery) or to collect from a local partner pharmacy as soon as one hour after the order is accepted.

Oral contraception

POP/ COC	Drug description	3 Month prescription cost		6 Month prescription cost		12 Month prescription cost	
		Local clinical patient management	Outsourced clinical patient management to SH.UK	Local clinical patient management	Outsourced clinical patient management to SH.UK	Local clinical patient management	Outsourced clinical patient management to SH.UK
POP	Desogestrel 75mcg	£19.98	£21.73	£24.40	£26.15	£32.93	£34.68
COC	Rigevidon (levonorgestrel 150mcg / ethinylestradiol 30mcg)	£17.64	£19.39	£20.87	£22.62	£27.06	£28.81

NuvaRing (etonogestrel 11.7mg / ethinylestradiol 2.7mg)	£37.40	£39.15

Emergency hormonal contraception

Emergency Hormonal Contraception Description	Local clinical patient management	Outsourced clinical patient management to SH.UK
ellaOne (Ulipristal acetate 30mg)	£27.21	£28.96
Levonorgestrel 1.5mg	£27.21	£28.96

Online condom distribution scheme

SH.UK can provide an online condom distribution scheme, allowing users to add condoms to their order at the point of ordering a postal test kit.

We can also work with local partners to develop online condom delivery or collection schemes for young people, with robust safeguarding procedures and clear links to testing services.

Condom package contents	Cost
12 condoms + 6 sachets of lube (petite, regular or large size)	£7.50
12 non-latex condoms + 6 sachets of lube	£8.50

Remote genital diagnosis and treatment

Users are initially asked triage questions about their health and symptoms.

Service users are then asked to upload a maximum of three photos of the affected area to our secure web platform.

Either an SH.UK clinician or partner clinician will then receive a notification of a new case for diagnosis.

SH.UK is the only provider that allows customers to choose between upskilling their local clinicians to complete photo diagnosis using the SH.UK platform, or to outsource this to SH.UK's clinical partner.

Once the clinician has reviewed this, the service user will receive a diagnosis from the clinician or be triaged to a local service if the clinician was unable to make a clear diagnosis.

Customers can choose to provide treatment to users themselves, or this can be outsourced to SH.UK through our pharmacy network. SH.UK can provide treatment for external genital warts and herpes. The service user can choose whether to have it delivered discreetly through the post, or they can collect it, from as soon as one hour after the order is confirmed, from one of our partner's pharmacies.

Genital warts or herpes treatment	Drug description	Local clinical patient management	Outsourced clinical patient management to SH.UK
Herpes	Lidocaine hydrochloride 5%	£23.37	£23.87
Herpes - Suppression	Aciclovir	£42.08	£42.58
Herpes - Single	Aciclovir	£18.70	£19.20
Herpes - Double	Aciclovir	£23.38	£23.88
Wart - Primary	Aldara (12ml)	£70.13	£70.63
Wart - Secondary	Warticon (3ml)	£37.40	£37.90

Contact us

Whether you're a local authority commissioner or an NHS organisation providing services, we can help.

We provide our service to 80+ NHS Trusts and local authorities nationally, supporting and upskilling clinical teams to provide a digital service. As the only customisable online sexual health service, we're able to focus on your needs and configure the service to meet your local requirements.
