

Pricing Document – September 2026

Launched in 2008, freetest.me is the longest running provider of public sector e-sexual health screening services. All prices include a web-portal for user ordering, cloud based clinical record system, integrated laboratory and treatment prescribing all supported by the freetest.me cloud-based service portal and clinical record system.

No mobilisation costs

There are no mobilisation or other hidden costs required to implement freetest.me.

Laboratory services

ISO 15189-accredited laboratory services in-house providing DaaS (Diagnostics as a Service). This creates streamlined process flows, improved quality, and reduced turnaround times. The Preventx Laboratory is accredited by the United Kingdom Accreditation Service to international ISO standards and adheres to strict quality system requirements.

Secure web-based reporting hub for reporting / live service information

The data rich nature of the freetest.me service allows generation of a wide range of reporting tools. These include reports on overall testing data, geographic breakdowns, demographic breakdowns, financials, repeat patient data, and the flexibility to develop custom reports which can be accessed 'live'.
