Data Loss Prevention
NIST-aligned DLP Maturity Assessment Datasheet

HELPING YOU SUCCEED WITH YOUR DATA PROTECTION STRATEGY

In today's fast-moving, data-driven world, protecting sensitive information is more complex than ever. Our DLP Maturity Assessment makes it simple. Using a clear, domain-based approach aligned with the NIST Cybersecurity Framework, we assess your technical controls, processes, and governance to give you a precise picture of where you stand. You'll gain clear insights, uncover hidden risks, and receive a tailored roadmap to strengthen your data protection, build resilience, and stay ahead of evolving threats.

What Does the Service Provide?

Baseline Assessment: Understand your current data loss prevention posture across key organisational domains using a structured, standards-aligned maturity framework.

Scored Maturity Model: Receive a quantified assessment using a 1 - 5 scale to benchmark maturity in areas such as governance, technology, process, and user awareness.

Gap Identification: Highlight capability shortfalls, inconsistent practices, and areas where investment or focus is required to meet business or regulatory expectations.

Prioritised Roadmap: Recommendations are broken down into short, medium, and long-term actions to support practical, staged improvement.

Visual Reporting: Outputs include easy-to-understand visual aids such as radar charts, domain-level summaries, and comparative scoring to aid decision-making.

Strategic Insight: Align DLP efforts with broader information security objectives, ensuring your programme is sustainable, risk-aware, and futureproof.

Key Benefits

- **Low Operational Overhead:** Minimal disruption using existing resources and targeted evidence gathering.
- **Actionable, Insightful Reporting:** Clear reports showing strengths, weaknesses, and next steps.
- **Maximise Value from Existing Investments:** Optimise tools and processes before spending on new.
- **Regulatory Readiness**: Map capabilities to compliance and close identified gaps.
- **Stakeholder Alignment:** Align strategy with business goals for future readiness.
- **Informed Strategic Planning:** A foundation to build or refine your broader data protection strategy, ensuring it is business-aligned, measurable, and future-facing.
- **Clarity on Gaps and Opportunities:** Expose blind spots and underdeveloped capabilities, with vendor-neutral recommendations.

The DLP Maturity Assessment is more than a point-in-time review; it's a strategic tool to help your organisation understand its current capability, identify meaningful opportunities for improvement, and build a clear, prioritised path toward a stronger data protection posture. By aligning people, processes, and technology under a structured framework, the assessment lays the foundation for a resilient and future proof DLP strategy.
