

For Donor Management

EspoCRM For Non-Profit Organisations

Non-profit organisations manage a wide range of relationships, from donors and members to beneficiaries, partners, and volunteers. Coordinating fundraising, programmes, events, and communications involves many interactions and data points. When this information is spread across spreadsheets or disconnected systems, it can quickly become difficult to manage, report on, and scale.

EspoCRM provides a single, central platform for managing non-profit relationships and activities. All records, including supporters, donors, beneficiaries, programmes, and campaigns, are stored in one place, giving teams a complete and consistent view of every interaction. This shared visibility improves collaboration, reduces duplication, and ensures continuity across teams.

The platform supports planning and delivery across fundraising and programmes, with built-in task management and workflows to assign responsibilities, track progress, and automate routine processes. Non-profits can segment audiences, deliver personalised communications, and monitor engagement before, during, and after campaigns or initiatives.

With real-time dashboards and reporting, EspoCRM enables non-profits to clearly demonstrate impact, track funding performance, and meet reporting requirements for boards, funders, and stakeholders. By reducing administration and improving insight, EspoCRM helps non-profit organisations focus more of their time and resources on achieving their mission.

EspoCRM User Interface

- **User-Friendly Interface –**
A clean, intuitive interface is crucial for ease of use and adoption.
- **Highly Customisable Layout –**
Being able to tailor the system to specific business needs is a top priority.
- **Workflow & Automation Integration –**
Automating tasks saves time and improves efficiency.
- **Inline Editing for Efficiency –**
Quick edits without navigating away improve productivity.
- **Role-Based Access Control –**
Ensuring data security and access control is critical for businesses.
- **Dynamic Panels & Relationships –**
Helps organise related data effectively within records.
- **Real-Time Data Updates –**
Keeping information up-to-date is essential for accuracy.
- **Mobile-Friendly & Responsive Design –**
Accessibility on different devices enhances flexibility.
- **Tabbed Interface for Better Organisation –**
Reduces clutter and makes navigation smoother.
- **Dashlets & Widgets –**
Custom widgets provide quick insights but are more of an enhancement than a necessity.

Non-Profit Management

- Unified view of supporters and stakeholders, Manage all relationships in one system, with full histories of interactions, support provided, and engagement.
- Fundraising & Funding management, Track donations, pledges, grants, and campaigns, linking income directly to donors, funds, and outcomes.
- Programme and service delivery tracking, Record referrals, services delivered, outcomes, and follow-ups to demonstrate impact and ensure continuity of care.
- Automation & governance and compliance, Automate acknowledgements, reminders, and internal workflows while maintaining consent, safeguarding, and audit trails.
- Reporting & impact Measurement, Produce clear reports on fundraising performance, service delivery, and beneficiary outcomes for trustees, funders, and regulators.

Sales Cycle Automation

- Streamline your process with sales cycle automation from lead to close
- Track and prioritise opportunities to focus on the most valuable deals
- Automate the creation and sending of quotes, sales orders, and invoices
- Manage products and services using configurable product catalogues
- Customise your sales pipeline with Entity and Layout Managers to match your sales process
- Forecast future revenue accurately with built-in revenue forecasting tools

Advanced Calendar & Scheduling

- Manage calls, tasks, meetings, and custom events in a single, unified calendar
- Receive in-app and email notifications to stay on top of your activities
- Send fully customisable invitations to event attendees
- Automatically generate follow-up activities using Workflow & BPM tools
- Collaborate seamlessly with your team using Shared Calendar Mode
- Synchronise EspoCRM events with Google and Outlook calendars

Analytics And Reporting

- Leverage powerful analytics and reporting to gain clear, actionable insights
- Evaluate event performance using Custom Reports
- Monitor key metrics in real time with Report Panels and Dashlets
- Export reports to Excel and CSV for further analysis and sharing
- Automate report distribution by scheduling results to be sent via email

Rich Customer Profiles

- Maintain a centralised client database for Contacts, Leads, and Accounts
- Customise customer profiles using Entity and Layout Managers to match your processes
- Link meetings, tasks, calls, and emails directly to the relevant records for full visibility
- Quickly locate records using powerful search filters
- Import and export data easily to support seamless record migration
- Synchronise contacts with Google and Outlook using the optional

Project Management

- Centralised project records, Manage projects with clear ownership, timelines, statuses, and priorities, all linked to customers, contacts, and opportunities.
- Task & milestone tracking, Break projects into tasks and milestones, assign owners, set deadlines, and monitor progress in real time.
- Resource & workload visibility, Track who is working on what, identify bottlenecks, and balance workloads across teams.
- Automation & notifications, Use workflows to trigger task creation, status updates, and alerts as projects move through key stages.

- EspoCRM: Optimised hosting and seamless integration for EspoCRM, ensuring peak performance and reliability.

Consulting (Architect Design)

We recognise that each organisation is unique. Our approach involves collaborating closely with our customers to identify their goals, map processes, and catalogue pain points. This thorough understanding allows us to determine the most suitable EspoCRM products and implementation strategies, ensuring a tailored solution that meets each organisation's specific needs and optimises their business processes for improved efficiency and success.

Configuration (Build)

Our accredited experts configure, launch, and customise EspoCRM to exact specifications. We adapt the platform to meet unique organisational needs, improve business processes, and overcome obstacles identified during the consulting phase. By ensuring a tailored solution, we optimise performance and provide a seamless, efficient, and effective CRM system that drives business success and enhances overall productivity.

Customisation (Core Code)

Our accredited experts create custom code to meet the unique requirements of your organisation. By adapting EspoCRM to align with your specific business processes and addressing any challenges identified during consultation, we ensure a bespoke solution that enhances efficiency and effectiveness. This custom coding guarantees that EspoCRM integrates seamlessly into your operations, optimising performance and driving business success.

Data Migration (Alignment)

Our specialists ensure a seamless transition of your data to EspoCRM using CloverETL. We meticulously plan and execute the migration process, leveraging CloverETL's powerful data alignment capabilities to maintain data integrity and minimise disruption to your operations. This ensures that all critical information is accurately transferred and readily accessible in the new system, providing a smooth and efficient migration experience that supports your business continuity and success.

Integration (Automation)

We core code and integrate solutions into EspoCRM using core code and APIs such as REST and SOAP. Additionally, we employ our enableFlow solution with ApacheAirflow and work with middleware tools like Workato, Talend, Make, and Zapier. This enables integration with nearly any existing on-premise or web-hosted application software, including accounting, CMS, ERP, and eCommerce systems, ensuring a comprehensive and flexible CRM solution tailored to your needs.

Training (Onboard)

We design training programs for EspoCRM around customer deployments, requirements, and tailored software systems. By focusing on role-specific needs and emphasising hands-on experience and user adoption, we ensure the most effective use of time. Our training helps users quickly become proficient with EspoCRM, maximising the system's benefits and supporting successful implementation and utilisation within the organisation.

Support (Success)

We provide an industry-leading Success program that supports your deployment of EspoCRM from before going live and for as long as customers wish to engage with the service. This includes full account management, with comprehensive guidance and support, ensuring that your organisation maximises the value and effectiveness of EspoCRM. Our dedicated team is there every step of the way to ensure your success and satisfaction with the platform.

Why enable.services?

Proven Approach

- Extensive experience delivering successful CRM and systems implementation projects
- Deep expertise in open-source technologies
- CRM specialists with an average of 5–20 years' hands-on industry experience across the team
- Established, repeatable best practices for EspoCRM implementations, refined through real-world delivery

Proven On-Time, On-Budget Implementation Methodology

- Structured time-to-value delivery approach focused on rapid, measurable outcomes
- Dedicated project team support throughout every phase of the implementation lifecycle
- Ongoing support to accommodate evolving business requirements, including UK hosting and compliance needs

Well Connected

- enable.services' Projects Team works in close partnership with EspoCRM
- Ability to leverage internal EspoCRM teams, trusted partners, and specialist expertise to fast-track issue resolution
- Direct access to EspoCRM executive management, ensuring alignment, escalation, and long-term success

EspoCRM Implementation Mythology

- ✓ Consistent, repeatable methodology for end-to-end “HD-CX” project delivery
- ✓ Focused on client outcomes and user adoption
- ✓ Pre-defined activities, tools and templates for each step in the delivery cycle
- ✓ Rapid time-to-value (“let the platform do the work”)
- ✓ Defined project communication and governance model

UK 07:30 to 18:00 Monday to Friday

Before we can work out how quickly we need to respond to an issue, we first have to triage it and assign it a priority. Support operatives usually prioritise tickets based on the matrix below

Impact / Urgency	High Urgency	Medium Urgency	Low Urgency
High Impact	Priority 1 - Critical	Priority 2 - High	Priority 3 - Medium
Medium Impact	Priority 2 - High	Priority 3 - Medium	Priority 4 - Low
Low Impact	Priority 3 - Medium	Priority 4 - Low	Priority 4 - Low

Once a priority has been established for a ticket, we'll use the table below to work out the applicable time that will apply for the various stages of the ticket lifecycle.

Priority	Respond within*	Plan within*	Resolve within*
Priority 1 – Critical	2 hrs	4 hrs	8 hrs
Priority 2 – High	4 hrs	24 hrs	48 hrs
Priority 3 – Medium	8 hrs	50 hrs	70 hrs
