## ASSURE

### Engage. Manage. Improve

Why do organisations still find it so difficult to effectively manage health and safety? Many organisations are still taking an inefficient approach to EHS due to a lack of buy-in along with a lack of investing in the right systems. The knock-on effect is a lack of engagement in EHS, inefficient processes, and increased risk of incidents and/or ill health.

We recognise that if things are easy to do, then people are more likely to do them. Assure has been developed with a suite of standard tools to make implementing and adopting a new approach a simple and stress-free process.

No matter where you are in your health and safety journey, a software like Assure, can continue to help you streamline your processes and improve engagement in EHS activities by all of your employees, leadership and third-party contractors.

You require a tool that can adapt and change as your EHS approach continues to mature and evolve. Assure's standard configuration tools allow you to manage that evolution by making necessary changes or adding new content that is identified through your ongoing audit processes.

#### Why Assure?

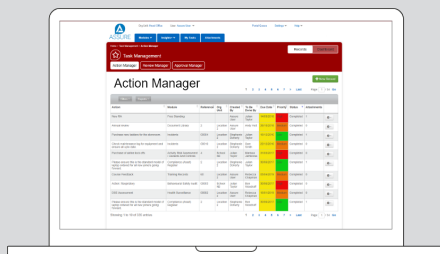

- **Effectively manage health and safety** – Assure has a suite of standard tools designed to help you manage all activities in one place.
- **Engage everyone** – Implement a simple, relevant, and accessible health and safety system to reach all your people.
- **Future proof** – Self configuration tools ensure you can keep building and expanding on the current solution, at any time, with your own resources.
- **Get to ROI fast** – We support you to quickly implement Assure so you can benefit from better health and safety data fast.
- **Support when needed** – Our team will closely work with you to select, implement, and further develop the right solutions for your team.

#### How does it work?

- Capture all your data using the mobile web app AssureGO+.
- Set triggers to send notifications to prompt next steps.
- Make critical safety information available to all your teams on AssureGO+.
- Configure, build, and amend forms to suit your requirements as they evolve and change.
- Efficiently manage your safety activities by ensuring that actions are closed out.
- Provide relevant management information simply and easily.
- Visualise and analyse all activities in easy to use, configurable dashboards.

## What's included?

- **AssureGO+ Mobile Web app** – Remove the barriers from reporting and collect all your safety data with easy-to-use mobile reporting available to employees and third parties, both online & offline.
- **Insights+** – Access configurable dashboards at all levels of the organisation to review performance and identify opportunities for improvements.
- **Action Management** – Create and assign corrective and preventative actions. Automatic triggers will remind and escalate actions and ensure a final quality check before completion.
- **My tasks** – Allow individuals to see at a glance prioritised activities that need to be completed, including actions, reviews, and approvals.
- **Notifications** – Set automated alerts and email notifications to tell the right people about the right things at the right time, to prompt follow-up.
- **Reviews & Approvals** – Stay compliant. Establish a sign-off process and ensure documents remain current by assigning review dates.
- **Projects** – Link and review all health and safety activities and documentation for a specific project in one place.
- **Configuration Tools** – Easy-to-use tools will allow you to adapt Assure to match your processes and adapt in line with ongoing organisational change.
- **Template Builder** – Refine best practice templates or develop your own business specific forms, including audits, inspections, and checklists.
- **Document library** – Store health and safety documentation in one central location for easy access, sharing and reviews.
- **People Register** – Get an overview of your employees and contractors. For each person see related records such as training, actions, equipment, and incidents.
- **Permissions** – Ensure people can access the right information and complete the correct activities through role-defined permission sets.
