Advania Service Definition Document

G-Cloud 15 - Lot 2b: Cloud Software

Our G-Cloud 15 Services: Overview

Advania delivers enterprise-grade Software as a Service solutions that empower Public Sector organisations to modernise operations, enhance collaboration, and drive digital transformation. Our SaaS portfolio spans critical business applications including CRM, ERP, AI-powered analytics, and collaboration platforms - all accessible via secure cloud infrastructure.

See the following page(s) for an overview of the service offered.

Our Team

Our team has deep knowledge and understanding of Public Sector and a track record of challenging legacy technologies, supporting new ways of working and new service models to enable users to work most effectively.

Ordering Process

Advania provides the services on a project or ad-hoc basis. We work with clients during a pre-sales stage to understand their requirements, outcomes and business benefit sought. We then design and agree the specific services which are captured in a Statement of Work (SoW). The client is required to accept and sign the SoW, with a defined invoice schedule and then raise an associated Purchase Order for the service. Once received, we promptly mobilise resources for the engagement.

On-boarding

Advania have a standard on-boarding and mobilisation approach for all our engagements. We typically run a kick-off meeting with the project sponsor and other relevant stakeholders to confirm the scope of the engagement, the key activities and outcomes, high-level timescales and the resources/inputs required from client's team(s) to ensure success. Agreed follow-on activities are then planned/executed.

Security and Information Assurance

Our engagements can cater for services of any classification. Our staff hold a range of NSV levels of vetting and can operate with information at all levels of the Government Security Classification (GSC) scheme.

Skills and Knowledge Transfer

We recognise that transfer of skills and knowledge to the client's team is a critical element of the G-Cloud services provided to any Public Sector clients. Our consultants and engineers are experienced in delivering skills and knowledge transfer using an approach, tailored to skills gap and individual(s), ensuring effectiveness and consistency.

Service Management

Advania has a wealth of experience in Service Management and toolsets across a broad range of platforms. We work with each client to implement the best-suited toolset(s) including Service Now, Azure and Microsoft 365 native monitoring, and 3rd Party Service Management toolsets.

Pricing

Full details are provided in the pricing document, including fixed price options which could be offered on a monthly billing cycle further to a small initial scoping exercise.

Off-boarding

During project closure, we will ensure all agreed deliverables have been provided and accepted by the client, completing skills transfer where appropriate. Any client data obtained through the course of the engagement is removed from our systems in strict accordance with the data deletion policy relevant to the information classification level.

Quest® On Demand Product Suite

Quest On Demand is a secure, Azure-hosted SaaS management platform to help IT teams move faster, tighten security and stay in control of hybrid Office 365 environments. Migrate, manage, report, secure and recover all hybrid AD and Office 365 workloads across all tenants from a single dashboard. The one stop platform for secure SaaS solutions for Office 365 migration, management, and security.

Features

- Migration
- Recovery
- Group Management
- Audit
- License Management
- Teams Management

Benefits

- Merge/consolidate Office 365 mail, accounts and data with day one coexistence
- Get granular backup and recovery of Office 365 and Azure AD users, attributes, groups and group memberships
- Ensure the optimum number of licenses are available to support your users
- Audit all changes made across Office 365 and Azure AD
- Control the chaos of Office 365, Azure AD and hybrid AD groups
- Assess, plan and execute migrations with ease to avoid issues and accelerate migration; track progress with real-time visibility

On Demand Migration: Quickly and safely migrate directories, mailboxes and shared data from one Office 365 tenant to another with instant coexistence. With On Demand Migration, you can accelerate your project by identifying potential issues early, plan and automate your move while also monitoring progress throughout. Simple client configuration helps get users working efficiently post migration to ensure Office 365 migration goes as smooth as possible.

Key Features

- Pre-migration discovery
- Collaboration and coexistence
- Account, mailbox and data migration
- Real-time dashboard monitoring

On Demand Audit: As you move more workloads to the Microsoft cloud, your reliance on Azure AD will increase, and so will the risk and complexity in securing your hybrid environment. Unfortunately, the Office 365 and Azure AD security logs do not provide consolidated views of on-premises and cloud activity, and Microsoft-provided tools do not make it easy to identify exploits, vulnerabilities and suspicious activity. On Demand Audit tracks all configuration, user and administrator changes made across AD, Azure AD, Exchange Online, SharePoint Online, OneDrive for Business and Teams. On Demand Audit proactively highlights security vulnerabilities and anomalous activity, and accelerates incident investigations through responsive search and contextual, interactive data visualizations.

Key Features

- Security vulnerability dashboard
- Integrated anomaly detection
- Hybrid identity auditing
- Responsive, flexible search
- Interactive data visualisations
- Real-time alerts on the move

On Demand License Management: Office 365 license management is a crucial role that ensures the optimum number of licenses are available to support your business today and into the future and, more importantly, that you aren't spending valuable IT budget on more licenses than you really need. Using an intuitive dashboard, you can gain complete visibility into Microsoft Office 365 and Azure AD licenses and get the reporting capabilities you need to more easily achieve optimal license utilisation, display and analyse trends and estimate license costs and loss. The bottom line... you can maintain license control and save money!

Key Features

- Security vulnerability dashboard
- Identify available licences/assignments
- Apply organisation-specific rates to show true costs
- Track end-user utilisation of provisioned Office 365 services
- Reveal costs of unused/under-used licences and assess alternative plans

About Advania UK

Advania UK – Overview

Advania UK is a leading cloud and digital transformation services provider helping ambitious organisations and their people to succeed.

We empower clients to transform the way they do business, optimise the way their people work, and provide them with flexible and secure platforms on which to operate. We are a prominent Microsoft partner, one of 25 elite partners around the world. We have offices located in London, Manchester, Milton Keynes, Reading, Cardiff and Sheffield.

Why Partner with Advania?

Microsoft Expertise and Partnership: We are one of the UK's leading and most awarded Microsoft services, solutions, and support providers with:

- **Global Education Partner of the Year 2023**
- **Global Customer Experience Partner of the Year 2022**
- **One of 4 UK providers with Azure Expert MSP status**
- **12 x Advanced Microsoft Specialisations**
- **Complete range of Solutions Partner designations (x 6) including Infrastructure (Azure), Digital & App Innovation (Azure), and Security**
- **Advania is one of only 4 providers in the UK (and one of 40 globally) to be recognised as (end-to-end) Solution Partner for Microsoft Cloud**

Specialist Knowledge: We have 8 x Microsoft MVP's (c.10% of the UK's total) as full-time permanent staff members who are directly involved in developing Microsoft's public offerings, including Microsoft Azure. This expertise in Microsoft technologies not only ensures our ability to deliver a successful outcome for the Buyers but also allows us to leverage our Microsoft relationship to support you in multiple ways.

Proven Track Record of Success: Over the last ten years, we have delivered a wide range of robust, scalable and future-proof cloud solutions for organisations across both the Public and Private sectors. This includes extensive experience in designing and deploying secure cloud landing zones, executing complex migrations, and modernising applications to fully leverage cloud-native capabilities.

Our Overall Service Proposition

Support & Managed Services

Managed 24x7 Service Desk, including shared, and dedicated resource models, NOC, IT Service & Process Management, and proactive Managed Services delivered by Technical Specialists across all competencies, all underpinned through our integrated ServiceNow ITSM solution.

Security & Compliance

Managed Security Service Provider with SOC, SIEM, Detection and Response, Threat Intelligence and Vulnerability Management capability, Managed Assurance services. Governance Risk and Compliance and vCISO consultancy services, Penetration Testing and Red Team.

Cloud, Platform & Networks

Transformation, Migration and Managed Services across all aspects of infrastructure. Multi-cloud with specialist Azure and private datacentre capability. Security, Business Continuity and Disaster Recovery, all managed through 24x7 Network Operations, Patching and Optimisation Services.

Unified Communications

Microsoft Teams Phone specialist providing Teams Direct Routing, Operator Connect, Contact Centre Solutions, Reporting and Analytics. Through our HALO platform we can take ownership of everything from the dial tone upwards, all managed by 24x7 Network Operations.

Digital Employee Experience

Deep expertise in all Microsoft 365 solutions, including Copilot SharePoint, Teams, and Endpoint, Device & Identity Management. Employee experience excellence through Fresh Intranet solution (integrated with M365). Business Change and Adoption Services

AI & Data

Specialist services in Microsoft Syntex, Copilot, Private ChatGPT, and tailored AI solutions such as RFP Automation tooling. Also covering Data & Analytics (Microsoft Fabric, Synapse Analytics, and Power BI), and Data Governance (Purview).

Technology Sourcing

Significant value-added supply chain capability for software, hardware, and consumable supply with strong partnerships with leading technology vendors including Microsoft, Cisco, Dell, HP, HPE, ServiceNow and Lenovo. Microsoft Tier 1 Direct CSP Partner with Cloud Insights capability.

Business Applications

Implementation, configuration, development and support of Microsoft Dynamics 365 Business Central, Dynamics 365 Sales and Microsoft Power Platform solutions.

Application Innovation

Application modernisation and development Services, from DevOps resource augmentation to applications/automation implementation and Technical Advisory.

Business Standards & Accreditations

Advania has achieved accreditation or certification in the following business and security standards:

The ISO 9001 accreditation provides our clients with the confidence that Advania consistently meets our client's expectations and regulatory requirements around service quality.

The ISO 27001 accreditation provides our clients with the assurance that Advania continually adheres to best practice standards relating to data security.

The ISO 22301 accreditation provides our clients with the comfort that Advania continually validates the maintenance and improvement of our business continuity management system.

The ISO 45001 accreditation provides our clients with the knowledge that Advania provides a safe and healthy working environment to our employees.

The Financial Services Supplier Qualification System (FSQS) is a framework that ensures suppliers to the financial services industry pass the required high standards to meet the needs of the buyers in the scheme.

Advania is an accredited supplier on the G-Cloud framework, offering a range of services to the public sector, including Managed Azure and Office 365 services.

ITIL Version 4 is the standard that the service desk uses to provide a single point of contact to users.

PRINCE2 is the standard that ensures our projects are accurately planned in measurable stages. PRINCE2 demands consistent project delivery and is flexible enough to scale to any size of project.

The Cyber Essentials certification provides our clients with the reassurance that Advania deploys controls to ensure we can defend against the most common forms of cyber attacks.

Advania adheres to the UK Data Protection Act 1998 and the EU Data Protection Directive (95/46/EC). Advania is registered with the Information Commissioner's Office (Registration No. ZA127305).
