G-Cloud 15 - Lot 3: Cloud Support

About Advania UK

Advania UK – Overview

Advania UK is a leading cloud and digital transformation services provider helping ambitious organisations and their people to succeed.

We empower clients to transform the way they do business, optimise the way their people work, and provide them with flexible and secure platforms on which to operate. We are a prominent Microsoft partner, one of 25 elite partners around the world. We have offices located in London, Manchester, Milton Keynes, Reading, Cardiff and Sheffield.

Microsoft Expertise and Partnership: We are one of the UK's leading and most awarded Microsoft services, solutions, and support providers with:

- Global Education Partner of the Year 2023
- Global Customer Experience Partner of the Year 2022
- One of 4 UK providers with Azure Expert MSP status
- 12 x Advanced Microsoft Specialisations
- Complete range of Solutions Partner designations including Infrastructure (Azure), Digital & App Innovation (Azure), and Security
- Advania is one of only 4 providers in the UK (and one of 40 globally) to be recognised as (end-to-end) Solution Partner for Microsoft Cloud.

Specialist Knowledge: We have 8 x Microsoft MVP's as full-time permanent staff members who are directly involved in developing Microsoft's public offerings, including Microsoft Azure. This expertise in Microsoft technologies not only ensures our ability to deliver a successful outcome but also allows us to leverage our Microsoft relationship to support you in multiple ways.

Proven Track Record of Success: We have performed a range of digital transformation, cloud migration, data & AI, and Microsoft based services for clients across both Public and Private sectors.

Business Standards & Accreditations

Advania has achieved accreditation or certification in the following business and security standards:

The ISO 9001 accreditation provides our clients with the confidence that Advania consistently meets our client's expectations and regulatory requirements around service quality.

The ISO 27001 accreditation provides our clients with the assurance that Advania continually adheres to best practice standards relating to data security.

The ISO 22301 accreditation provides our clients with the comfort that Advania continually validates the maintenance and improvement of our business continuity management system.

The ISO 45001 accreditation provides our clients with the knowledge that Advania provides a safe and healthy working environment to our employees.

The Financial Services Supplier Qualification System (FSQS) is a framework that ensures suppliers to the financial services industry pass the required high standards to meet the needs of the buyers in the scheme.

Advania is an accredited supplier on the G-Cloud framework, offering a range of services to the public sector, including Managed Azure and Office 365 services.

ITIL Version 4 is the standard that the service desk uses to provide a single point of contact to users.

PRINCE2 is the standard that ensures our projects are accurately planned in measurable stages. PRINCE2 demands consistent project delivery and is flexible enough to scale to any size of project.

The Cyber Essentials certification provides our clients with the reassurance that Advania deploys controls to ensure we can defend against the most common forms of cyber attacks.

Advania adheres to the UK Data Protection Act 1998 and the EU Data Protection Directive (95/46/EC). Advania is registered with the Information Commissioner's Office (Registration No. ZA127305).

G-Cloud 15 Service Definitions

Our G-Cloud 15 Services: Overview

Whether you require support in designing your future technology roadmap, need support mid-project to drive forward your new services, technologies and processes or require help with encouraging users to work and behave differently, Advania have the knowledge, skills, expertise and scale to be able to offer high-quality, reasonably priced consulting services.

See the following pages for an overview of each service offered.

Our Team

Our team has deep knowledge and understanding of Public Sector and a track record of challenging legacy technologies, supporting new ways of working and new service models to enable users to work most effectively.

Ordering Process

Advania provides the services on a project or ad-hoc basis. We work with clients during a pre-sales stage to understand their requirements, outcomes and business benefit sought. We then design and agree the specific services which are captured in a Statement of Work (SoW). The client is required to accept and sign the SoW, with a defined invoice schedule and then raise an associated Purchase Order for the service. Once received, we promptly mobilise resources for the engagement.

On-boarding

Advania have a standard on-boarding and mobilisation approach for all our engagements. We typically run a kick-off meeting with the project sponsor and other relevant stakeholders to confirm the scope of the engagement, the key activities and outcomes, high-level timescales and the resources/inputs required from client's team(s) to ensure success. Agreed follow-on activities are then planned/executed.

Security and Information Assurance

Our engagements can cater for services of any classification. Our staff hold a range of NSV levels of vetting and can operate with information at all levels of the Government Security Classification (GSC) scheme.

Skills and Knowledge Transfer

We recognise that transfer of skills and knowledge to the client's team is a critical element of the G-Cloud services provided to any Public Sector clients. Our consultants and engineers are experienced in delivering skills and knowledge transfer using an approach, tailored to skills gap and individual(s), ensuring effectiveness and consistency.

Service Management

Advania has a wealth of experience in Service Management and toolsets across a broad range of platforms. We work with each client to implement the best-suited toolset(s) including Service Now, Azure and Microsoft 365 native monitoring, and 3rd Party Service Management toolsets.

Off-boarding

During project closure, we will ensure all agreed deliverables have been provided and accepted by the client, completing skills transfer where appropriate. Any client data obtained through the course of the engagement is removed from our systems in strict accordance with the data deletion policy relevant to the information classification level.

Azure Virtual Desktop

Service Overview

Microsoft Azure Virtual Desktop (AVD) provides an easy path to modernise your environment and reduce data centre costs. AVD is designed for secure, flexible, mobile and remote working for your users. We can provide engineering and support services to support the AVD setup and configuration. Using our Windows Virtual Desktop deployment services you can enable secure, flexible, mobile and remote working by electing to host your Windows 10/11 desktop environment in Azure. Our service includes a fully project-managed migration to a cloud-based Windows environment and Windows 365. your environment.

Deliver the only multi-session Windows 10 virtual desktop experience

Enable optimizations for Microsoft 365 Apps for enterprise

Migrate Windows Server remote desktops and apps to Azure

Deploy and scale in minutes

Features

- Set-up and configuration of Azure Virtual Desktop (AVD)
- Support the full desktop virtualization environment in your Azure subscription
- Advice on Azure cost optimisation - reducing cost with pooled, multi-session resources
- AVD user testing and assurance
- Windows 7 virtual desktops with free Extended Security Updates
- Productivity and experience optimisation for AVD
- Unified management experience for Windows10/11 and Windows Server
- Nerdio Manager for Enterprise
- Advania Managed AVD service, powered by Nerdio

Benefits

- Optimise set-up of Azure Virtual Desktop on Azure
- Multi-session Windows 11 deployment delivering a full W11 with scalability
- Modernised virtual apps and desktops deployments with Microsoft Azure Virtual Desktop
- Virtualize Microsoft365 Apps for business and optimise for multi-user virtual-scenarios
- Bring existing Remote Desktop Services and Windows Server desktops/apps to any computer
- Strengthen Windows 10 boot protections and credential storage
- Manage Windows10, Windows Server, Windows7 and Windows365 desktops/apps with a unified management experience
- Provide cost optimisation in Azure - Azure costs are not included.
- Optionally can include Nerdio tooling for Cost optimisation and Enhanced Management across Hybrid AVD and Win 365 deployments
- Work securely from any location with Internet access
- Enhance desktop experience for end users
- Integrates with existing applications and services
- Configuration, image building and application packaging
- Disaster recovery and business continuity included
- Experienced Azure Experts with sector specific understanding
- With the Managed AVD service:
 - Pro-active monitoring
 - Software maintenance and deployment
 - Session host maintenance and patching
 - User profile storage maintenance
 - Image management
 - Scripted actions and automation
