Access Eploy

Pricing Document

1 Access Eploy - Applicant Tracking System and Recruitment CRM

Eploy is a cloud-based recruitment platform built for modern in-house recruitment teams, combining an Applicant Tracking System, Recruitment CRM, onboarding, and analytics into a single web-based platform. It's fully integrated with an organisation's careers site, delivering a seamless experience for both candidates and hiring teams, and supports complex recruitment needs including multiple brands, varied workflows, and global hiring.

For the public sector variants, Eploy positions itself as the complete ATS Talent Acquisition platform for NHS, Central Government, Local Authorities, Education and the Public Sector, combining Applicant Tracking System, Talent CRM, Talent Pools, Onboarding, Analytics and careers site with integrations for IDVT, HRIS, assessments, background checking and multi-posting. Key features listed include job requisition and approval management, talent pooling and pipelines, candidate attraction and job posting, candidate relationship management, applicant tracking, recruitment process workflows, candidate assessment and video interviewing, and job offers/onboarding with electronic signatures.

One-to-One Online Training (up to 10 people)	£200 per hour
Webinar Training (up to 50 delegates – listen only)	£350 per hour

3 Onboarding, Implementation & Timescales

Your project commencement date is the day on which we receive your signed Eploy Order Form and initial payment. At this point, we will allocate you an Implementation Manager (this will typically be within 1 to 3 weeks of the commencement date, however during busy periods this may be longer). Your Implementation Manager will then be in touch to arrange a commencement call during which they will discuss your project timelines and organise a project start date. Within 12 weeks of the project start date, we will expect to complete your full system implementation (Go-live date). Once we have allocated your start date, we will

provide a comprehensive project plan, detailing key milestones, feedback periods and areas of responsibility, ensuring you can plan your internal resources appropriately.

As Eploy is a cloud-based solution, you will have access to a test environment throughout the project for UAT and any initial training and consultation sessions. Our methodology ensures you are completely confident at each stage of the implementation and are fully prepared to execute your “go-live” plan, which we will prepare with you. The plan includes transitioning from any incumbent system and managing live vacancies and candidates that are currently in your recruitment pipeline.

4 Training, Support & Maintenance

We deliver dedicated training courses at each stage of your implementation, but our trainers are always available should you need any additional bespoke sessions. Available training includes:

- **Customer Preparation Training.** We will invite you to attend a series of hour-long Webinars which introduce you and your team to the system, its key components and discusses the options available to you for system customisation. These Webinars also provide greater clarity on the information we require from you to help configure your system. We will also invite you to attend a Standard User Training day, delivered via webinar, which looks at a typical Vacancy lifecycle, using a generic training system. This training day will complement the other training sessions you attend during this phase of implementation and provide greater context around each of the topics while providing a basic understanding of how Eploy works, how to navigate around the system and how to carry out the most common tasks performed during a vacancy lifecycle
- **Customer Configuration Training.** Once we have fully understood your specific requirements, we will begin to build your system. During this period, you will be able to start defining your Recruitment Workflows, Email and Document Templates, Screening Forms and Security Settings. Dedicated training Webinars are available to you during this phase to teach you how to plan for and make the necessary changes to these areas of the system, ready for testing.
- **User Acceptance Testing Training.** During the Testing phase, User Acceptance Testing (UAT) Training will be available to you and your team. We explore the topic of User Acceptance Testing from the ground up, comparing a good from a bad UAT. We will also look at how to feed back any issues resulting from your testing to us and explore in detail the types of problems that you can resolve yourself.
- **Standard User Training.** Once your system has been fully configured and tested, we will deliver Standard User Training. We will teach your Recruitment teams how to process your Vacancies and Applications from creation through to Placement, looking at the process from each vantage point – the Core System, Hiring Manager, Candidate and

Vendor Portals. We will use your fully configured system and processes for this training day.

- **System Administration Training.** This is a dedicated training course for your System Administrators and Super Users to provide them with the skills necessary to keep your system up to date. This training course can be delivered at any time, including during implementation, if you wish.
- **Proactive Recruitment/Talent Pooling Training.** This 6-hour training course and workshop will teach you how to use the tools available to you within Eploy to search your Candidate pool and find Candidates already within your system who may be suitable for any of your Vacancies. We will teach you how to tag Candidates and Vacancies using Skills to help speed up the search process, and how to add "watchdog" widgets to your Dashboards, identifying new talent as they register, according to pre-defined criteria. This course is typically delivered 6-8 weeks after your system has gone live.
- **Dashboards and Reporting Workshop.** During this workshop, we will teach you how to optimise your existing Dashboards and create new ones through the use of Metrics and Widgets. We will also show you how to use these dashboards as the launching point for creating and running bespoke reports, using the Eploy Reports Builder. We will then work with you to help you define and create your new Dashboards and Reports, and show you how to share them with other Eploy Users and Hiring Managers.
- **Hiring Manager Training.** Although Hiring Manager training is typically handled in-house, it is an additional service we are able to offer. We can deliver Hiring Manager training on-site, or via webinar. We are also able to produce training videos for your Hiring Managers. If you would like to explore the options available, please speak to a member of our Sales or Training team.
- **Bespoke Training.** If you would like to combine elements from any of our courses into a single bespoke training course, our Training team would be more than happy to discuss the options with you and customise a training even to suit your requirements.

Once the system has gone live, your team will have ongoing access to:

- The Eploy Knowledge Base which includes extensive training manuals, quick reference guides, recorded webinars and videos
- Direct access to our UK-based Customer Success team
- All future system updates and upgrades

Eploy has a dedicated support team on hand during office hours. As Eploy is managed entirely by us, most support queries usually are to do with system use. Our friendly team are always willing to answer all questions, no matter how large or small.
