

A close-up portrait of a woman with curly blonde hair, smiling warmly. She is wearing blue medical scrubs. The background is a soft-focus clinical setting.

RESTART

Interoperable Digital Care

INTEGRATION SERVICES

for interoperability

Working solely in the Health and Care sectors, we have developed 2000+ interfaces, for over 80 NHS Trusts, with 40 NHS 24/7 365 Support customers.

OUR SUCCESS

As the UK's leading integration experts, we are skilled at connecting a diverse range of data systems to ensure information flows between users, promoting efficiency, security, and cohesion.

Whether utilising IRIS, Rhapsody, Mirth and Qvera we will collaborate with you to enhance efficiency and streamline workflows, ensuring seamless interoperability.

ReStart's Integration Engineering team is experienced in collaborative, long-term project-based work, aiming to improve existing and develop new integration solutions that enable systems to achieve their maximum capabilities. We offer ongoing system support for live interfaces, commonly referred to as "Business As Usual."

We are dedicated to meeting your specific interoperability needs and achieving your goals.

SUCCESS IN NUMBERS

ReStart connects health and care organisations throughout the UK. Connecting people, data and systems to help our customers grow at pace.

OUR EXPERTISE

Whether you require full end to end integration services support or you have a large scale integration requirement, we can help by providing efficiency through seamless connectivity and integration.

PROACTIVE SUPPORT

By implementing robust proactive monitoring processes, we contribute to a healthier system and offer a clearer overview of its status.

DESIGN, BUILD & TEST

We utilise a diverse range of technologies and best practice techniques to ensure that interfaces align with your specific requirements.

RESILIENT SOLUTIONS

We have the necessary experience to ensure that your integrated solutions are robust, future-proofed and well-suited for a demanding operational environment.

DATA MANAGEMENT

We ensure data accuracy, reliability and security, whilst improving operational efficiency, regulatory compliance and data insights.

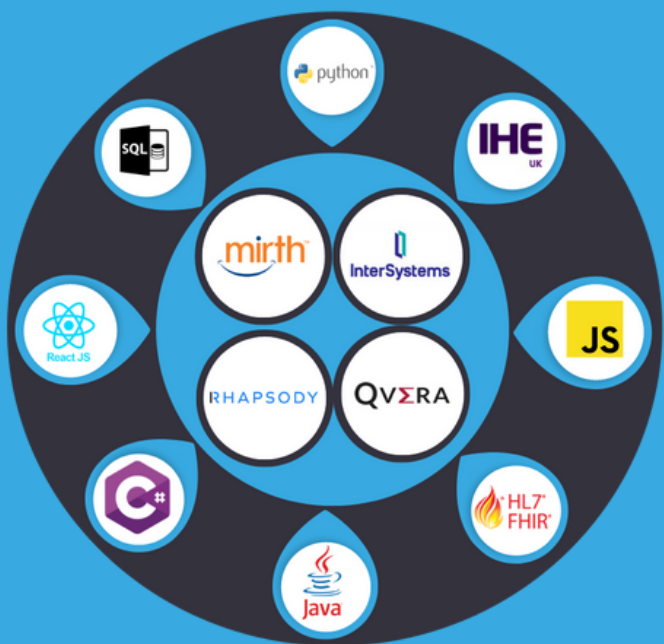

“ It was extremely useful to have ReStart on hand to answer technical queries. We’ve learnt a lot from them, and the more we learn the better we are as a development team. It’s been a great partnership. ”

Chris Pursey, IT Principle Development Consultant, NHS

HOW WE CAN BENEFIT YOU

SKILLS & EXPERIENCE

Our team have extensive experience in developing and supporting tools such as .Net, MS Biztalk, MS PowerBI, MS SSIS, Node-JS, InterSystems Ensemble/HealthShare, Pulsetile, QVERA, Rhapsody 5.x and 6.x, Mirth, and all other major integration engine (IE) platforms, both proprietary and Open Source.

SEAMLESS INTEGRATION

We fit in seamlessly with your team, going the extra mile to make sure project goals and objectives are inline with healthcare operational processes and National Targets

FLEXIBLE, AGILE & FAST PACED

No matter whether you need single interface development or help with digital transformation, we have a team of multi-disciplined experts.

MORE COLLABORATION

Utilising ReStart's team enables you to establish new connections, benefitting smooth transition of interfaces, updated standards, and providing efficient management and security of your integration environment.

“ReStart were selected due to their vast experience in successfully implementing and supporting integration solutions.”

Paul Foster, Head of IT Services and Systems Development,
South West Yorkshire Partnership NHS Foundation Trust

OUR PARTNERS

At ReStart, we have fostered strong partnerships with leading global technology firms, including Better, InterSystems, Healthcare Gateway, Insight, DrDoctor and many more. These alliances enable us to support application and infrastructure development, ensuring digital maturity.

Whether it's access to primary care data, e-prescribing, or cloud technology, our experts possess the experience and skills needed to work seamlessly with partners to meet your unique requirements.

ABOUT US

ReStart are a strategic digital partner dedicated to health and care organisations. ReStart was incorporated in 2003 and has been consulting, supporting and delivering innovative technology solutions that offer fast pace and positive improvements to healthcare pathways and patient care.

Our highly skilled and dedicated team offers integration and interoperability healthcare consultancy services, project management, and 24/7 365 Integration Engine Support. We pride ourselves in offering a service to our customers, which enables them to connect their data and systems without restrictions.

Our vision is to work collaboratively with NHS, health and care organisations to deliver bespoke and customisable solutions to improve patient experiences. Our goal is to support teams, systems and deliver improvements for the future.
