Service Overview

Since 2006, The Anywhere Company has been providing consultancy services and SaaS software implementation services to clients in the UK and worldwide. Having worked with many of the SaaS software platforms on the market, we have experienced the right way and wrong way to approach implementation.

Our customers benefit from this experience in terms of time saved and reduced costs. Our SaaS implementation service applies primarily to The Anywhere Platform solution, however our consultancy services apply to all SaaS scenarios with the tooling being one factor in our consulting approach.

Key Features of our services:

- **UK based** – UK based company with UK based resources for delivery.
- **Process Definition and Design** – Provide analysis, advisory and documentation of your business process, along with the technical design on how to make them a reality.
- **Software Configuration** – Once your processes are designed, we can configure the software, process workflows, and reporting, to make them a reality.
- **Software Testing** – Our team provides in depth testing of all SaaS Solutions from a functional, security and technical approach.
- **Integrations in Multi-Tool Environments** – Provide implementation and advisory on how to integrate and get the most out of the multiple tools in your environment.
- **Training and Education** – Our training team provides end user training on processes and tools and how to integrate them into your day-to-day business.
- **Experienced Advisory** – Our highly experienced senior staff can provide you with the advisory to set your strategy and achieve your goals.
- **Change Management** – We provide a full-service change management service, helping you transition from your old systems and ways of working to your new.
- **The Managed Maturity Programme (MAP)** - for The Anywhere Platform - provides a framework to build maturity alignment across the organisation. MAP is a combination of technology and business maturity approaches that creates a digitised and measurable step-by-step path to greater maturity.

By taking a maturity driven approach, our customers can transform the way they manage and report on investments across the organisation and deliver significant benefits such as efficiency gains, reduced time to value, and risk mitigation in portfolio investments by creating a consistent, repeatable and scalable operation.

On Boarding

Our on-boarding process is extremely simple.

1. Define the specific scope
2. Order
3. Deliver the benefits
4. Review

Each customer has slightly different needs and desired outcomes. The Anywhere Company partners with you to ensure you maximise your Return-on-Investment and have an easy experience.

Off Boarding

The Anywhere Company commits to provide the appropriate handover for the service.

Pricing

Please refer to the associated SFIA rate Card.

Termination

If a customer needs to terminate, they may do so providing 90 days' notice subject to the Terms & Conditions.

About The Anywhere Company

TAC constantly endeavours to provide the best people-friendly technology and advisory and managed services to help organisations work better. Our focus has been to provide technology solutions and services for business to manage people, process and financials.

- We are a UK-based business with UK-based delivery resources.
- We provide delivery and support services for the solutions on The Anywhere Platform, these are Project and Portfolio Management, Governance Risk and Compliance, and Strategic Performance Management.
- We partner with our customers, nurturing a close relationship for mutual success.
- We provide a high concentration of specific skills and understand how to bridge business and technology.
- Our experienced team brings you innovative and future-proof technology solutions and ensures you achieve the desired Return-On-Investment.
