Public Safety

Assuring the Resilience of the UK's National Infrastructure

Supporting the Strategic Road Network

The National Highways digital estate is a highly complex ecosystem, comprising 130 suppliers and 40 services.

Working as a trusted partner with National Highways since 2019, we have supported its Digital Services team to manage suppliers, reduce downtime, and deliver significant improvements to processes.

Streamlining UK-EU Trade with NCTS5

HM Revenue
& Customs

Netcompany's ERMIS solution replaced HMRC's 20-year-old legacy system with the **New Computerised Transit System Phase (NCTS)**.

The modernised, automated customs procedures for UK and EU traders improve efficiency and reduce waste.

Saving 600K+ hours in GP Surgery Administrative Work

Over 95% of **UK GP surgeries** are now processing 2.4+ million patient registrations through the NHS App.

Our work with NHS England has enabled the full digitalisation of the patient registration process, reducing what used to take weeks down to minutes.

Assuring National Security through Safe Modernisation

Home Office

We work with the **Home Office** to modernise critical national infrastructure, enhancing public safety.

Our expertise supports initiatives that bolster national security and Policing efforts, such as the NIAM (National Identity and Authentication Management) technology platform.

Migrating 47 Mission-Critical Applications to the Cloud

Ministry
of Defence

We worked with the **UK Ministry of Defence** to migrate 47 mission-critical applications to MODCloud, supporting over 330,000 military and civilian users.

This transformation strengthens security, reduces downtime, and enables future innovation.

Microsoft Power Platform Design, Development and Integration Service

Power Apps Power Automate Power BI Power Virtual Agents

Netcompany's unique Methodology enables organisations to rapidly design, deploy and maximise the benefits of the Microsoft Power Platform, including Power Apps, Power Automate, Power BI and Power Virtual Agents. Utilising low code/no code applications, chat bots, workflow/process automation and detailed MI/reporting to accelerate delivery with reduced risk and complexity.

Service Features

1. Low-code / no-code Power Platform Development
2. Integration and Analytics
3. Adaptive Security and Compliance Frameworks
4. Proven delivery methodology
5. Natural Language Querying
6. Compliance and Governance Best Practice
7. Performance Optimisation Audits
8. Knowledge Management Solutions
9. Agile Project Management Tools
10. Post implementation management, support, training, monitoring and reporting

Service Benefits

1. Accelerated Digital Transformation
2. Enhanced Business Agility
3. Improved Employee Productivity
4. Cost Efficiency
5. Unified Data Management
6. Scalability and Resilience
7. Compliance and Governance Best Practice
8. Center of Excellence community
9. Proven successful delivery methodology
10. Low-code / no-code

Microsoft Power Platform Design, Development and Integration Service

Power Apps
Power Automate

Power Virtual Agents

The Service

Netcompany provides a comprehensive Microsoft Power Platform Design, Development and Integration Service uniquely tailored to meet the needs of your organisation.

We will work with you using methodologies, toolsets and blueprints that are proven to implement designs securely, on time and within your budget.

We work with our customers to understand their specific needs, discuss the art of the possible and combine this with many years experience to tailor the solution.

Netcompany offer the Microsoft Design, Development and Integration Service across the Microsoft Power Platform.

What does it do?

Uncover insights with Microsoft Power BI

- Make sense of data with insightful visualisations
- Add Power BI reports into Teams or custom dashboards
- Share data insights during meetings in Microsoft Teams
- Easily create reports from Excel or CSV in SharePoint
- Use AI to get insights faster

Automate routine tasks with Power Automate

- Automate business processes with low-code solutions
- Connect and automate cloud/on-premises data services
- Use prebuilt templates for business processes like approvals, alerts, data collection, and reminders
- Use advanced scenarios with branching conditions, multiple steps, Visio process modelling, and more

Build custom apps with Microsoft Power Apps

- Build low-code apps for PC and mobile for use in Teams
- Access PowerApps within a Microsoft Teams channel
- Share the apps you create with your organisation to use
- Connect to business data in SharePoint or 300+ services

Respond rapidly to your needs with Power Virtual Agents

- Build bots quickly and easily with low-code GUI
- Scale securely with centralised management

How we do it

We begin with governance discussions, documentation, as-is review, and assessment before embarking on any journey with you. We discuss options, delivery methods, associated services, costs, pros and cons, and ongoing support and maintenance where applicable.

Netcompany then develop a strategy and plan in partnership with the stakeholders that addresses the requirements and clearly defines the scope of the project plan.

Discovery/Assess

Regular meetings and workshops with key stakeholders to determine scope, time and cost. Migration checklist is formed. Netcompany will then start the Discovery process in alignment with the key objectives outlined by the business. The objectives are then assessed and addressed to determine whether the solution, technical requirements, or any specific regulatory/security requirements are met.

Design & Implementation

During the design process, we collaborate with existing support teams and key personnel to share information gathered from the discovery phase, to create detailed high level and low-level design documents. During the implementation phase, we prepare the hosting environment and provision the service using the agreed baselines and guidelines. This is so we can run a proof-of-concept to demonstrate the environment is created within scope and is deemed ready for testing.

Pilot

Using proven and agreed baselines, the new services are provisioned in the cloud ready for pilot testing. The new services are created with the desired specifications or better. Performance and latency are actively monitored.

A subset of pilot users/early adopters will test the migrated service to ensure that the newly migrated workload will deliver to the expectations set. The network access, server and application performance will be tested, which will contribute to the validation.

Once validation criteria has passed, feedback on the service is obtained to help further iron out any discrepancies. After agreement, the pilot process is signed off, the project can then commence.

Migration and Deployment

Netcompany have extensive experience of complex infrastructure migrations. Working with us you will receive the benefits of this experience and using our tried and tested Netcompany approach ensures a low-risk delivery.

It is important to establish clear roles and responsibilities for the delivery and identify and engage with Stakeholders at early stages to introduce the project and take them on the journey with us.

We take full ownership and responsibility for the setup of the delivery/service and can manage and oversee the smooth transition from an existing supplier where applicable.

How we work

A photograph of a group of people in a meeting or conference. In the foreground, a man with a beard and short blonde hair, wearing a white shirt, is smiling and looking towards the right. Behind him, another man in a blue shirt is partially visible. To the right, a woman with long brown hair, wearing a grey jacket, is also looking towards the right. The background is blurred, showing other people in the room. The overall lighting is warm and professional.

We empower societies, companies and institutions to take control of their processes and data.

Dedicated to a Greener, Fairer Future

- Netcompany is more than a business; we're a community of employees, customers and partners committed to a sustainable and fair society.
- When working towards the Social Value Quality Mark, we developed a set of seven pledges. These support our alignment with the United Nations' Sustainable Development Goals and the UK Government's Social Value Model. Furthermore, they underpin the development of our social and environmental impact initiatives.
- We are proud to be the winner of awards and accolades from our work and contribution to social value creation and community well-being.

Social Value in 2024

■ Communities

Netcompany partners with schools, charities and SMEs to build digital skills, improve access to technology and create inclusive opportunities. Through volunteering, mentoring and targeted programmes, Netcompany reached **10,000 people** across **480 hours of volunteering** in 2024, running and contributing to events with Ahead partnership, Rebel Business School and more. Netcompany helped local areas strengthen in resilience, employability and long-term economic growth with the creation of **201 FTE jobs** across London, Birmingham, Leeds and Edinburgh of which 100% are **paid real living wage**.

■ People

Netcompany invests in our people through inclusive recruitment, apprenticeships and continuous learning. We delivered **7,000 hours of digital upskilling** through our dedicated Academy in areas of digital, management and personal development. We support underrepresented groups into meaningful careers, with **4 new apprentices** who are supported by our ERGs (Women, Multicultural, Veterans, LGBTQ, Neurodiversity). Netcompany has achieved demographic representation above the industry average in areas such as ethnic minority, who make up **46% of our workforce**. We promote fair pay, wellbeing and progression, delivering **180 hours of wellbeing intervention** in 2024 through access to specialists and webinars targeting mental and physical health, and financial management.

■ Environment

Netcompany is reducing carbon emissions through an **EV scheme adopted by 13% of our staff**, promoting green IT through project Green Team Charters and tackling tech waste through our partnership with Good Things Foundation. We embed sustainable practices in delivery and supply chains, ensuring our ecosystems meet minimum requirements and support biodiversity volunteering with the NHS.

Domain expertise across many industries

- With vast technology experience and deep public sector specific knowledge, we quickly create innovative solutions tailored to your goals, delivering outcomes to address the intricate challenges currently facing governments.
- Through our innovative delivery approach, true client partnerships and exceptional people, we design and deliver solutions that have dramatically increased user engagement and provide better citizen and customer experiences for us all.

We are the customer's partner first, the software vendor's second

Netcompany is a tech-agnostic IT solutions provider, and we are entirely independent – always opting for the precise mix of technologies that is optimal to your business.

With expertise in all modern technologies and industry-targeted digital tools, we guide you through your options, combining components and software with the goal of finding the right balance between needs, agility and operating costs.

What We Do – and How

Championing Digital Sovereignty and Responsible Digitalisation, we deliver end-to-end IT services – even where others couldn't.

End-to-end transformation delivery capability

A singular delivery model that sets us apart

Open platform approach

- Legacy-free solutions with full customer ownership
- Technology agnostic – customer needs is the only thing that dictates technology choices
- Reusable components and portfolio of future-proof platforms and products

Access to unique talent

- IT people leading IT people
- No knowledge gaps
- Interdisciplinary and cross-organisational teams
- Scalable project cell structure

Building digital maturity

- Highly collaborative, on-site development approach
- We share our expertise and educate your organisation
- We nurture your digital maturity and independence

Controlled agile delivery

- A perfect mix of waterfall and agile virtues
- Control and predictability in harmony with lean, continuous improvements and adaptation

Next-generation digital transformation

Platforms for the future

A platform is something to build on. It's a solid foundation. It's safe. It's re-usable. In short, it's a responsible way of doing IT.

Why Netcompany platforms?

■ Reliability from re-use

Our platform approach prioritises successful re-use, ensuring consistency and reliability for clients, and reducing development redundancy with cutting-edge technical platforms.

■ Reduced risk

Our meticulous documentation and use of proven platforms provide a high level of transparency and agility, ensuring timely delivery with reduced risks.

Netcompany Platforms

Easily customisable, rapidly deployable,
and AI-ready - for the futureproof business.

CONTROL TOWER

PULSE™ is a control tower for a real-time data ecosystem that allows businesses to share and act on a single source of truth.

It facilitates adaptable planning and forecasting in changing circumstances, breaking down silos and providing a single view of plan, execution and results.

PROCESS AND ADMINISTRATION

AMPLIO™ is our platform for regulated case management and process automation in highly compliant environments. It's a powerful tool for digitising and controlling complex processes, providing a single source of truth for all business executions.

DIGITAL POST & ARCHIVE

AMI™ is a secure platform that connects businesses and people. As a Digital Wallet, it offers a range of compliant 'my site' features like archive, profile, sign, and pay-as-a-service.

Additionally, AMI allows fast data and document exchange with other businesses.

GENERATIVE AI PLATFORM

EASLEY AI™ orchestrates and leverages existing AI models, quickly connecting them to your unique business data, tools, and processes, centralising and storing data securely within EASLEY – not with the model provider – to ensure full transparency and governance of AI.

The strategic benefits of our platforms

Industry shaping products

Our purpose-built products solve complex challenges in targeted business domains. They are the result of years of refinement, delivering the perfect balance of reliability, flexibility, and transparency.

Why Netcompany products?

■ You could settle for a standard product

Off-the-shelf IT products promise speed and low cost with minimal custom work. Yet they often fall short of meeting your unique needs – leading to integration issues and hidden expenses.

■ Or choose the better way

Our range of products is designed to match your specific requirements. They offer modular integration, one transparent price to eliminate surprises, and an open-source foundation.

■ In short –

A generic IT product might seem appealing at first, but its long-term drawbacks – limited flexibility, rising costs, and integration headaches—can add up. Our products deliver the reliability, adaptability, and transparency your business needs – the result of years of refinement.

Netcompany Products

TAXATION

SOLON TAX™ is our built for purpose commercial-off-the-shelf (COTS) product for taxpayer and revenue management operations and process automation in complex revenue authority environments.

CUSTOMS

ERMIS™ is a dedicated, self-contained, reusable, and integrated family of customs solutions, with continuously evolving capabilities designed to be the customs operations management system of choice for customs administrations.

SOCIAL SECURITY

PERSEUS™ is our purpose-built commercial off-the-shelf (COTS) product for employers, insured persons, social security revenues, pensions, and benefits management operations. It facilitates process automation in complex social security environments.

DIGITAL BANKING

DX4B™ is our leading-edge digital banking solution, offering mobile banking, web banking, open banking, and digital wallets with a focus on interoperability and scalability.

RISK ANALYSIS

LUMENUS™ is a next-gen risk analysis solution designed for the public sector, offering increased usability, seamless interoperability, and a modern technology stack.

■ Our products are to our platforms what specialised tools are to a general-purpose toolkit.

While the latter reuse components across industries, our products target specific industries or business processes.

Together, they maximise our ability to reuse software at scale.

Our customers are the ones to reap the benefits.

Greater reliability

Lower costs

Fast deployment

Simple, transparent pricing scheme
