

Netcompany

Platform Implementation Services

Changing Europe with responsible digitalisation

Empowering digital societies through responsible digitalisation

- Founded in 2000 in Copenhagen, Denmark, Netcompany delivers critical IT and Digital solutions across public and private sectors
- Supporting digital transformation for efficient, sustainable futures, we are a trusted partner in Supply Chain, Transportation, Utilities, and Government
- With our ‘Reuse, not Reinvent’ approach, we offer cross-sector and international best practices to support legacy modernization
- We accelerate and enable digital foundations with cloud, automating operations, and running mission-critical services with confidence

Public Safety

Assuring the Resilience of the UK's National Infrastructure

Supporting the Strategic Road Network

The National Highways digital estate is a highly complex ecosystem, comprising 130 suppliers and 40 services.

Working as a trusted partner with National Highways since 2019, we have supported its Digital Services team to manage suppliers, reduce downtime, and deliver significant improvements to processes.

Streamlining UK-EU Trade with NCTS5

HM Revenue
& Customs

Netcompany's ERMIS solution replaced HMRC's 20-year-old legacy system with the **New Computerised Transit System Phase (NCTS)**.

The modernised, automated customs procedures for UK and EU traders improve efficiency and reduce waste.

Saving 600K+ hours in GP Surgery Administrative Work

Over 95% of **UK GP surgeries** are now processing 2.4+ million patient registrations through the NHS App.

Our work with NHS England has enabled the full digitalisation of the patient registration process, reducing what used to take weeks down to minutes.

Assuring National Security through Safe Modernisation

Home Office

We work with the **Home Office** to modernise critical national infrastructure, enhancing public safety.

Our expertise supports initiatives that bolster national security and Policing efforts, such as the NIAM (National Identity and Authentication Management) technology platform.

Migrating 47 Mission-Critical Applications to the Cloud

Ministry
of Defence

We worked with the **UK Ministry of Defence** to migrate 47 mission-critical applications to MODCloud, supporting over 330,000 military and civilian users.

This transformation strengthens security, reduces downtime, and enables future innovation.

Platform Implementation Services

Turn accelerators into outcomes. We implement Netcompany platforms including PULSE, AMI, AMPLIO, EASLEY, PROFITS(DX4B), PERSEUS and VERA. Our discovery-to-cutover approach shortens timelines, manages risk, and enables high-performance operations that evolve with your business.

Service Features

1. Tailored platform configuration aligned to business objectives, processes and constraints
2. End-to-end architecture and integration design for APIs, events and legacy
3. Secure identity, access, secrets management, policy enforcement across environments
4. Data architecture: models, pipelines, governance, lineage, quality, observability
5. Platform coding: custom extensions, integrations, reusable module configuration, secure patterns
6. Automated CI/CD configuration, infrastructure-as-code, testing, release orchestration for speed
7. Workload migration planning, execution, validation, rollback strategies minimizing disruption
8. Performance tuning, capacity planning, cost optimisation, resilience planning
9. Governance, risk and compliance mapped to regulations, audits, controls reporting
10. Change management, training, playbooks and operating model transition for adoption

Service Benefits

1. Cross-sector track record delivers robust platforms that perform in reality
2. Practitioner-led methods ensure consistent quality and fewer implementation surprises
3. Integrated DevOps shrinks release cycles while preserving stability and reliability
4. Outcome-driven governance protects scope, budget, timelines, and measurable value
5. Flexible approach fits your processes, accelerating collaboration and decision-making
6. Proven delivery playbooks cut risk and produces predictable, repeatable outcomes
7. Continuous improvement culture drives innovation and sustained performance gains
8. Standardised patterns speeds up configuration and integrations across complex estates
9. Delivery excellence in our DNA ensures on-time, on-budget implementations
10. Your vision operationalised into platforms that scale, adapt, and endure.

Delivering Platforms for the Future

CONTROL TOWER

PULSE™ is a control tower for a real-time data ecosystem that allows businesses to share and act on a single source of truth.

It facilitates adaptable planning and forecasting in changing circumstances, breaking down silos and providing a single view of plan, execution and results.

PULSE

PROCESS AND ADMINISTRATION

AMPLIO™ is Netcompany's platform for regulated case management and process automation in highly compliant environments.

It's a powerful tool for digitising and controlling complex processes, providing a single source of truth for all business executions.

AMPLIO

DIGITAL POST & ARCHIVE

AMI™ is a secure platform that connects businesses and people. As a Digital Wallet, it offers a range of compliant 'my site' features like archive, profile, sign, and pay-as-a-service.

Additionally, AMI allows fast data and document exchange with other businesses.

AMI

GENERATIVE AI PLATFORM

EASLEY AI™ orchestrates and leverages existing AI models, quickly connecting them to your unique business data, tools, and processes, centralising and storing data securely within EASLEY – not with the model provider – to ensure full transparency and governance of AI.

EASLEY AI

Delivering Platforms for the Future

REVENUE & BENEFITS MANAGEMENT PLATFORM

PERSEUS is a purpose-built digital platform for Social Security and Pensions management, enabling organisations to automate complex end-to-end processes across revenues, compliance, pensions and benefits, while operating on a single, trusted source of data.

PERSEUS

CORE BANKING SYSTEM

PROFITS[®] is a modular Core Banking platform that enables financial institutions to run end-to-end banking operations on a single, secure system of record, supporting rapid product rollout, scalability, and customer-centric service delivery.

PROFITS

CONTROL TOWER FOR DEFENCE AND RESILIENCE

VERÁ is a modular data integration platform, AI driven workflow engine and digital twin solution engineered for the defence sector's unique security and operational demands. It provides a dynamic, single view by fusing multi-domain data, empowering commanders to achieve decision superiority across missions, from situational awareness to logistics.

PULSE - The Enterprise Orchestration Platform

A platform is something to build on. It's a solid foundation. It's safe. It's re-usable. In short, it's a responsible way of doing IT. Netcompany's PULSE™ embodies this philosophy, offering a flexible and multi-purpose architecture that empowers true business agility.

PULSE orchestrates your complex enterprise ecosystem into a seamless workflow, bridging isolated business functions with real-time connectivity.

PULSE is a real-time enterprise orchestration platform that acts as a central "control tower" for complex enterprise environments. It connects the moving parts of a business by ingesting and reconciling data from disparate systems to create a single, authoritative source of truth. Unlike traditional static reporting tools, PULSE operationalises this data, bridging the gap between isolated business functions and enabling direct action through a unified interface. Its microservices-based architecture allows organisations to progressively modernise legacy infrastructure and embed scalable AI directly into workflows, ensuring that stakeholders can synchronise their planning, execution, and response to disruptions in real-time.

AMPLIO – The Process and Administration platform

AMPLIO is a modular platform for public-sector case and process management that fits existing IT, consolidates data, automates decisions, and scales to national use. It's proven in critical services, handling billions of euros, thousands of caseworkers, and hundreds of millions of events.

AMPLIO

For citizens:

- Quicker, clearer, fair decisions with proactive updates across preferred channels, without repeatedly providing the same information.
- Transparency reduces uncertainty and enquiries, and secure data handling builds trust—making services feel faster, more predictable, and responsive.

For Government:

- Agencies deliver faster with fewer backlogs and more consistent, compliant decisions, while automation and integrations cut costs and phase out legacy.
- Start small, integrate quickly, and scale—avoiding risky big-bang rebuilds
- Leaders get real-time visibility into throughput, SLAs, and risk, and can update policies in days, reducing modernisation risk.

AMI – The Citizen Enablement platform

AMI is a secure digital communications platform that enables government and citizens not just to exchange messages, but to act on them — with trust, consent and evidential assurance built in. It provides the foundation to mature the citizens digital engagement with government.

For citizens this means one place to securely interact with government, on any device at any time. For government this same platform helps streamline processes, accelerate the launch of new services and provide evidenced assurance. It's designed in a modular way that gives government agencies control over the rate of change in a citizens digital experience.

AMI is structured around three core capabilities:

- **Archive**
Digitise outgoing mail. Store and manage sensitive communications and records with full audit trails.
- **Act**
Digitise Citizen interaction. Offer branded self-service experiences with forms, payments, and digital signatures through enhanced features delivered into digital communications.
- **Connect**
Digitise and Enhance Entire User Journeys. Integrate AMI capabilities into your systems and partner workflows via APIs, utilising centralised or decentralised digital wallets

EASLEY – The Generative AI Platform

EASLEY AI is an advisor, customer service assistant, proposal writer, documentation manager, and software developer for the public and private sector.

EASLEY AI

EASLEY is designed with European values at heart. It runs on fully sovereign, European AI infrastructure, giving you complete control over your data. You can choose any model provider you wish, with no vendor lock-in. And with full oversight and governance of all AI assistants within your organisation, you can scale your AI initiatives responsibly in line with European legislation and your organisational needs.

EASLEY AI's accelerating platform already contains the tools to quickly set up specific assistants without needing an elaborate IT project. Our services let you start benefiting from AI capabilities immediately while maintaining the security and control your organisation requires.

Perseus – The Revenue & Benefits Management Platform

PERSEUS is our purpose-built commercial off-the-shelf (COTS) product for employers, insured persons, social security revenues, pensions, and benefits management operations. It facilitates process automation in complex social security environments.

P E R S E U S

The biggest challenges social security organisations face is achieving sustainability and longevity of the social security system for future generations and handling the complexity of rules and regulations derived from continuous restructuring of strategies, legislation changes, and processes reform. They need to adapt quickly and easily to these changes while providing direct customer engagement for employers and insured persons through advanced e-collaboration services. This also involves addressing the increasing need to dig into data to identify possible fraud and non-compliance.

PERSEUS addresses these challenges and needs, representing 23 years of domain experience in automating social security services and modernising multiple and large pension funds.

Profits (DX4B) – The Core Banking System Platform

PROFITS® is a state-of-the-art, robust and reliable Core Banking solution that is the system of choice for many financial institutions around the world. Its distinctive features enable financial institutions to streamline their business processes, embrace new distribution strategies, implement critical enterprise capabilities and achieve swift market entry.

DX4B

The solution embraces a modular architecture that allows financial institutions to easily roll out new offerings and scale them vertically or horizontally rapidly and in line with their customer needs, empowering them to accelerate market response. It consists of a full set of components, seamlessly integrated with each other and covering all core and near core banking functionality, such as ERP functionality, in a modular manner. Due to this architecture PROFITS® can be installed either fully or componentised, utilising embedded or additional components that are all governed by the same architectural and integration principles.

The Customer-in-the-centre approach enhances the ability of Financial Institutions to understand their customers' needs and advance the personalisation of services. Embedded analytics on the customer's overall relationship provide insight for predictive sales and service assistance. As a result, Financial Institutions are provided the tools for business growth and effective customer relationship management.

PROFITS® extensive capabilities, configurability and adaptability is proven by numerous installations in a variety of financial institution types such as:

- Retail & Corporate Banks
- Neobanks & Electronic Money Institutions
- Credit Servicers
- Credit Unions & Cooperative Banks
- Micro Finance Credit Institutions

VERÁ -The Defence Operational Orchestration Platform

A platform is something to build on. It's a solid foundation. It's safe. It's re-usable. In short, it's a responsible way of doing IT. Netcompany's VERÁ embodies this philosophy, offering a flexible and multi-purpose architecture that empowers true operational agility and informed decision making .

VERÁ orchestrates your complex data ecosystem into a seamless workflow, bridging isolated service functions with real-time connectivity.

VERÁ is a real-time Defence focused enterprise orchestration platform that acts as a central "control tower" for complex operational environments. It connects the moving parts of an organisation by ingesting and reconciling data from disparate systems to create a single, authoritative source of truth. Unlike traditional static reporting tools, VERÁ operationalises this data, bridging the gap between isolated operational functions and enabling direct action through a unified interface. Its microservices-based architecture allows organisations to progressively modernise legacy infrastructure and embed scalable AI directly into workflows, ensuring that stakeholders can synchronise their planning, execution, and response to disruptions in real-time.

How we work

A photograph of a group of people in a meeting or conference. In the foreground, a man with a beard and short blonde hair, wearing a white shirt, is smiling and looking towards the right. Behind him, another man in a blue shirt is partially visible. To the right, a woman with long brown hair, wearing a grey jacket, is also looking towards the right. The background is blurred, showing other people in the room. The overall lighting is warm and professional.

We empower societies, companies and institutions to take control of their processes and data.

Dedicated to a Greener, Fairer Future

- Netcompany is more than a business; we're a community of employees, customers and partners committed to a sustainable and fair society.
- When working towards the Social Value Quality Mark, we developed a set of seven pledges. These support our alignment with the United Nations' Sustainable Development Goals and the UK Government's Social Value Model. Furthermore, they underpin the development of our social and environmental impact initiatives.
- We are proud to be the winner of awards and accolades from our work and contribution to social value creation and community well-being.

Social Value in 2024

■ Communities

Netcompany partners with schools, charities and SMEs to build digital skills, improve access to technology and create inclusive opportunities. Through volunteering, mentoring and targeted programmes, Netcompany reached **10,000 people** across **480 hours of volunteering** in 2024, running and contributing to events with Ahead partnership, Rebel Business School and more. Netcompany helped local areas strengthen in resilience, employability and long-term economic growth with the creation of **201 FTE jobs** across London, Birmingham, Leeds and Edinburgh of which 100% are **paid real living wage**.

■ People

Netcompany invests in our people through inclusive recruitment, apprenticeships and continuous learning. We delivered **7,000 hours of digital upskilling** through our dedicated Academy in areas of digital, management and personal development. We support underrepresented groups into meaningful careers, with **4 new apprentices** who are supported by our ERGs (Women, Multicultural, Veterans, LGBTQ, Neurodiversity). Netcompany has achieved demographic representation above the industry average in areas such as ethnic minority, who make up **46% of our workforce**. We promote fair pay, wellbeing and progression, delivering **180 hours of wellbeing intervention** in 2024 through access to specialists and webinars targeting mental and physical health, and financial management.

■ Environment

Netcompany is reducing carbon emissions through an **EV scheme adopted by 13% of our staff**, promoting green IT through project Green Team Charters and tackling tech waste through our partnership with Good Things Foundation. We embed sustainable practices in delivery and supply chains, ensuring our ecosystems meet minimum requirements and support biodiversity volunteering with the NHS.

Domain expertise across many industries

- With vast technology experience and deep public sector specific knowledge, we quickly create innovative solutions tailored to your goals, delivering outcomes to address the intricate challenges currently facing governments.
- Through our innovative delivery approach, true client partnerships and exceptional people, we design and deliver solutions that have dramatically increased user engagement and provide better citizen and customer experiences for us all.

We are the customer's partner first, the software vendor's second

Netcompany is a tech-agnostic IT solutions provider, and we are entirely independent – always opting for the precise mix of technologies that is optimal to your business.

With expertise in all modern technologies and industry-targeted digital tools, we guide you through your options, combining components and software with the goal of finding the right balance between needs, agility and operating costs.

What We Do – and How

Championing Digital Sovereignty and Responsible Digitalisation, we deliver end-to-end IT services – even where others couldn't.

A singular delivery model that sets us apart

Open platform approach

- Legacy-free solutions with full customer ownership
- Technology agnostic – customer needs is the only thing that dictates technology choices
- Reusable components and portfolio of future-proof platforms and products

Access to unique talent

- IT people leading IT people
- No knowledge gaps
- Interdisciplinary and cross-organisational teams
- Scalable project cell structure

Building digital maturity

- Highly collaborative, on-site development approach
- We share our expertise and educate your organisation
- We nurture your digital maturity and independence

Controlled agile delivery

- A perfect mix of waterfall and agile virtues
- Control and predictability in harmony with lean, continuous improvements and adaptation

Next-generation digital transformation

Platforms for the future

A platform is something to build on. It's a solid foundation. It's safe. It's re-usable. In short, it's a responsible way of doing IT.

Why Netcompany platforms?

■ Reliability from re-use

Our platform approach prioritises successful re-use, ensuring consistency and reliability for clients, and reducing development redundancy with cutting-edge technical platforms.

■ Reduced risk

Our meticulous documentation and use of proven platforms provide a high level of transparency and agility, ensuring timely delivery with reduced risks.

Netcompany Platforms

Easily customisable, rapidly deployable,
and AI-ready - for the futureproof business.

CONTROL
TOWER

PULSE™ is a control tower for a real-time data ecosystem that allows businesses to share and act on a single source of truth.

It facilitates adaptable planning and forecasting in changing circumstances, breaking down silos and providing a single view of plan, execution and results.

PROCESS AND
ADMINISTRATION

AMPLIO™ is our platform for regulated case management and process automation in highly compliant environments. It's a powerful tool for digitising and controlling complex processes, providing a single source of truth for all business executions.

DIGITAL POST
& ARCHIVE

AMI™ is a secure platform that connects businesses and people. As a Digital Wallet, it offers a range of compliant 'my site' features like archive, profile, sign, and pay-as-a-service.

Additionally, AMI allows fast data and document exchange with other businesses.

GENERATIVE AI
PLATFORM

EASLEY AI™ orchestrates and leverages existing AI models, quickly connecting them to your unique business data, tools, and processes, centralising and storing data securely within EASLEY – not with the model provider – to ensure full transparency and governance of AI.

The strategic benefits of our platforms

Industry shaping products

Our purpose-built products solve complex challenges in targeted business domains. They are the result of years of refinement, delivering the perfect balance of reliability, flexibility, and transparency.

Why Netcompany products?

■ You could settle for a standard product

Off-the-shelf IT products promise speed and low cost with minimal custom work. Yet they often fall short of meeting your unique needs – leading to integration issues and hidden expenses.

■ Or choose the better way

Our range of products is designed to match your specific requirements. They offer modular integration, one transparent price to eliminate surprises, and an open-source foundation.

■ In short –

A generic IT product might seem appealing at first, but its long-term drawbacks – limited flexibility, rising costs, and integration headaches—can add up. Our products deliver the reliability, adaptability, and transparency your business needs – the result of years of refinement.

Netcompany Products

TAXATION

SOLON TAX™ is our built for purpose commercial-off-the-shelf (COTS) product for taxpayer and revenue management operations and process automation in complex revenue authority environments.

CUSTOMS

ERMIS™ is a dedicated, self-contained, reusable, and integrated family of customs solutions, with continuously evolving capabilities designed to be the customs operations management system of choice for customs administrations.

SOCIAL SECURITY

PERSEUS™ is our purpose-built commercial off-the-shelf (COTS) product for employers, insured persons, social security revenues, pensions, and benefits management operations. It facilitates process automation in complex social security environments.

DIGITAL BANKING

DX4B™ is our leading-edge digital banking solution, offering mobile banking, web banking, open banking, and digital wallets with a focus on interoperability and scalability.

RISK ANALYSIS

LUMENUS™ is a next-gen risk analysis solution designed for the public sector, offering increased usability, seamless interoperability, and a modern technology stack.

■ Our products are to our platforms what specialised tools are to a general-purpose toolkit.

While the latter reuse components across industries, our products target specific industries or business processes.

Together, they maximise our ability to reuse software at scale.

Our customers are the ones to reap the benefits.

Greater reliability

Lower costs

Fast deployment

Simple, transparent pricing scheme
