Vera Real-time Enterprise Platform for Defence and Resilience

Pricing Document

VERÁ -The Defence Operational Orchestration Platform

Overview

Vera pricing is based on a monthly License fee for the “platform core”. Subscription Licensing terms are available on a monthly (or annual) basis, and the subscription fee covers software access and upgrade entitlements; application implementation and support services are offered separately and are not part of the base subscription fee. Where additional development and implementation costs are incurred, these can be commercialised separately by purchasing our "Platform Implementation" service listed under Lot 3. These costs are derived from the size and scope of the requirements needed by the authority.

The Platform can be packaged across two tiers; Core and Enterprise.

VERÁ Core	VERÁ Enterprise
All features and modules included.	Includes Vera Core. Enables high-availability deployment. Enables scaling for high data volumes.
Vera Core: £23,400/month	Vera Enterprise: £63,000/month

Assumptions and Caveats

- Prices do not include infrastructure and associated software license costs (*these scale with your organisation and usage requirements*).
- Operational support is offered via optional plans; no support entitlements are included with the base subscription.
- Pricing does not include VAT
- Customer is responsible for end user devices
- Customer is responsible for appropriate connectivity (including VPNs for chosen infrastructure) for back-office users
- License pack includes provision for 1 Test and 1 Production environment, additional environments can be licensed at additional cost
- Implementation and third-party integration costs are not included in the pricing – See the "Platform Implementation" service listed under Lot 3
- The platform is inheritably configurable, so we suggest a conversation to work out the best licensing fit for your organisation
- Other license conditions apply please reach out to find out more
