PROFITS[®] Core Banking System Pricing

Framework reference: RM1557.15

January 2026

PROFITS CORE BANKING SYSTEM- PRICING

Netcompany offers a diverse range of commercial models for Profits®. Our customer agreements are tailored to suit individual needs, considering multiple factors such as the size of the company, the number of users, transaction volume and the scope of work. The number of required Profits® modules to deliver the necessary functionality is also considered.

We provide flexible compensation options, including prepaid license agreements as well as annual fee structures, which are balanced while the customer actively uses the product.

The following pricing is a baseline monthly Cloud fee, incorporating core on-boarding and maintenance services. The baseline monthly fee is £ 10,450.00 and covers an unlimited number of internal and external users.

Where additional development and implementation costs are incurred, these can be commercialised separately by purchasing our "Platform Implementation" service listed under Lot 3. These costs are derived from the size and scope of the requirements needed by the authority.

ASSUMPTIONS AND CAVEATS	SERVICES AT EXTRA COST
• Monthly fee excludes the target deployment infrastructure and/or the cloud hosting components • Monthly fee includes maintenance and support services • Pricing does not include VAT • RPI applies • Customer is responsible for end user devices • Customer is responsible for appropriate connectivity (including VPN to cloud) for back-office users • Two environments, PRODUCTION and TESTING, are offered with the Cloud implementation • Implementation and third-party integration costs are not included in the pricing	• Implementation services (GAP analysis for additional custom functionality, configuration and/or interfaces) • Data migration services • UAT activities • implementation of integrations to third-party services/platforms • Additional technical support services • Additional operational support • End-of-contract activities, customized plan and data extraction • Online ticketing system • Additional services are charged according to Netcompany rate card
