Assuring the Resilience of the UK's National Infrastructure

Supporting the Strategic Road Network

The National Highways digital estate is a highly complex ecosystem, comprising 130 suppliers and 40 services.

Working as a trusted partner with National Highways since 2019, we have supported its Digital Services team to manage suppliers, reduce downtime, and deliver significant improvements to processes.

Streamlining UK-EU Trade with NCTS5

HM Revenue
& Customs

Netcompany's ERMIS solution replaced HMRC's 20-year-old legacy system with the **New Computerised Transit System Phase (NCTS)**.

The modernised, automated customs procedures for UK and EU traders improve efficiency and reduce waste.

Saving 600K+ hours in GP Surgery Administrative Work

Over 95% of **UK GP surgeries** are now processing 2.4+ million patient registrations through the NHS App.

Our work with NHS England has enabled the full digitalisation of the patient registration process, reducing what used to take weeks down to minutes.

Assuring National Security through Safe Modernisation

Home Office

We work with the **Home Office** to modernise critical national infrastructure, enhancing public safety.

Our expertise supports initiatives that bolster national security and Policing efforts, such as the NIAM (National Identity and Authentication Management) technology platform.

Migrating 47 Mission-Critical Applications to the Cloud

Ministry
of Defence

We worked with the **UK Ministry of Defence** to migrate 47 mission-critical applications to MODCloud, supporting over 330,000 military and civilian users.

This transformation strengthens security, reduces downtime, and enables future innovation.

Microsoft Data Migration Service

Microsoft Data Migration Service incorporates cloud design and migration services and provides comprehensive tailored strategies to deliver Office 365 enhanced security, storage, sharing, communication and collaboration functionality. We use our tried-and-tested methodology, tools and blueprints to migrate your users and services to Office 365 cloud-based SaaS solutions successfully and efficiently.

Service Features

1. Effective transition from on-premise legacy solution to Microsoft 365.
2. Data Migration from Microsoft SharePoint, OneDrive, Box, DropBox, on-premise fileshares.
3. User migration with user experience in mind.
4. Migration from on-premise Microsoft Exchange technologies and Lotus Notes, IMAP.
5. Migration from Skype for Business, Slack, SameTime to Microsoft Teams.
6. Secure Email Migration, Project Planning & Scheduling, Email Flow.
7. Enterprise Mobility + Security alongside Microsoft 365 enablement.
8. Service element design including Identity Services, MFA, Mail and Teams.
9. Hybrid Active Directory configuration and Entra ID integration.
10. Decommission legacy environments and Microsoft 365 training, advice and support.

Service Benefits

1. Enable a modern digital workplace incorporating Microsoft best practices.
2. Proven, low risk migration strategy through assessment, plan, implementation.
3. Proven methodology from experienced team in cloud technology adoption.
4. Enhances Business Continuity capabilities through online, flexible working practices.
5. Hardware/licensing cost reduction through as-is assessment.
6. Business change support, training and user adoption assistance.
7. Ensures business readiness through assessment and expert guidance.
8. Collaboration through online documents with co-authoring and version control.
9. Secure document storage consolidation with OneDrive, and SharePoint Online.
10. Migration Scheduling, Migration Implementation, User Communications, Migration Support, SIAM.

Microsoft Data Migration Service

The Service

Netcompany's Microsoft data migration service provides a comprehensive tailored migration strategy to deliver Microsoft enhanced security, storage, sharing, communication and collaboration functionality.

We use our tried-and-tested methodology, tools and blueprints to migrate data and related services to Microsoft 365 cloud-based SaaS solutions successfully and efficiently.

We engage with our stakeholders to better understand their specific requirements, carry out detailed discoveries and assessment of their current environment.

The following services, are offered by Netcompany.

- Effective transition from on-premise legacy solution to Office 365.
- Data Migration from Microsoft SharePoint, OneDrive, Box, DropBox, fileshares.
- Data Migration from on premise services such as file and print servers and NetApp.
- User Migration, Automatic Message Redirection, Outlook Profile and user provisioning.
- Migration from Email systems such as Microsoft Exchange, Lotus Notes, IMAP and any other web-based mail.
- Migration from messaging systems such as Skype, Lync, Slack and Webex to name a few examples.
- Secure Email Migration, Project Planning & Scheduling, Email Flow.

What does it do?

Reduces total cost of ownership, enables a more sustainable environment, and is more manageable via a single online platform.

By working with Netcompany, our services provide your organisation with detailed transparent cost analysis and predictions based on current workloads.

These services offer great benefits and prove highly scalable, highly available, and allow for the new environments to be disaster recovery compliant.

Designing a cloud-based Modern Converged Communications environment also introduces security with Microsoft 365 integration for online document storage, data governance, DLP, and identity security.

How we do it

Netcompany will engage with stakeholders to quickly mobilise and collaborate to establish a strong working relationship.

At the initial stages, through project kick-off meetings and workshops, we gain a clear understanding of goals, requirements and the current challenges.

We ensure that our stakeholders have a clear view of the shape of the engagement and are confident that their requirements will be met.

Microsoft Data Migration Service

We begin with governance discussions, documentation, as-is review, and assessment.

We discuss options, delivery methods, associated services, costs, pros and cons, and ongoing support and maintenance where applicable.

Netcompany then develop a strategy and plan in partnership with the stakeholders that addresses the requirements and clearly defines the scope of the project plan.

Discovery

Regular meetings and workshops with key stakeholders to determine scope, time and cost. A migration checklist is then formed. Netcompany will then start the Discovery process in alignment with the key objectives outlined by the business. The objectives are then assessed and addressed to determine whether the solution, technical requirements, or any specific regulatory/security requirements are met.

Design & Implementation

During the design process, we collaborate with existing support teams and key personnel to share information gathered from the discovery phase, to create detailed high and low-level design documents. During the implementation phase, we prepare the hosting environment and provision the service using the agreed baselines and guidelines. This is so we can run a proof-of-concept to demonstrate the environment is created within scope and is deemed ready for testing.

Pilot

Using proven and agreed baselines, the new services are provisioned in the cloud ready for pilot testing. The new services are created with the desired specifications or better. Performance and latency are actively monitored.

A subset of pilot users/early adopters test the migrated service to ensure that the newly migrated workload will deliver to the expectations set. The network access, server and application performance is tested, contributing to the validation.

Once validation criteria has passed, feedback on the service is obtained to help further iron out any discrepancies. After agreement, the pilot process is signed off, then the project can then commence.

Migration and Deployment

Netcompany have extensive experience of complex infrastructure migrations. Working with us you will receive the benefits of this experience and using our tried and tested Netcompany approach ensures a low-risk delivery.

It is important to establish clear roles and responsibilities for the delivery and identify and engage with Stakeholders at early stages to introduce the project and take them on the journey with us.

We take full ownership and responsibility for the setup of the delivery/service and can manage and oversee the smooth transition from an existing supplier where applicable.

How we work

A photograph of a group of people in a meeting or conference. In the foreground, a man with a beard and short blonde hair, wearing a white shirt, is smiling and looking towards the left. Behind him, another man in a blue shirt is also looking left. To the right, a woman with long brown hair, wearing a grey jacket, is looking towards the same direction. The background is blurred, showing other people in the room. The overall lighting is warm and professional.

We empower societies, companies and institutions to take control of their processes and data.

Dedicated to a Greener, Fairer Future

- Netcompany is more than a business; we're a community of employees, customers and partners committed to a sustainable and fair society.
- When working towards the Social Value Quality Mark, we developed a set of seven pledges. These support our alignment with the United Nations' Sustainable Development Goals and the UK Government's Social Value Model. Furthermore, they underpin the development of our social and environmental impact initiatives.
- We are proud to be the winner of awards and accolades from our work and contribution to social value creation and community well-being.

Social Value in 2024

■ Communities

Netcompany partners with schools, charities and SMEs to build digital skills, improve access to technology and create inclusive opportunities. Through volunteering, mentoring and targeted programmes, Netcompany reached **10,000 people** across **480 hours of volunteering** in 2024, running and contributing to events with Ahead partnership, Rebel Business School and more. Netcompany helped local areas strengthen in resilience, employability and long-term economic growth with the creation of **201 FTE jobs** across London, Birmingham, Leeds and Edinburgh of which 100% are **paid real living wage**.

■ People

Netcompany invests in our people through inclusive recruitment, apprenticeships and continuous learning. We delivered **7,000 hours of digital upskilling** through our dedicated Academy in areas of digital, management and personal development. We support underrepresented groups into meaningful careers, with **4 new apprentices** who are supported by our ERGs (Women, Multicultural, Veterans, LGBTQ, Neurodiversity). Netcompany has achieved demographic representation above the industry average in areas such as ethnic minority, who make up **46% of our workforce**. We promote fair pay, wellbeing and progression, delivering **180 hours of wellbeing intervention** in 2024 through access to specialists and webinars targeting mental and physical health, and financial management.

■ Environment

Netcompany is reducing carbon emissions through an **EV scheme adopted by 13% of our staff**, promoting green IT through project Green Team Charters and tackling tech waste through our partnership with Good Things Foundation. We embed sustainable practices in delivery and supply chains, ensuring our ecosystems meet minimum requirements and support biodiversity volunteering with the NHS.

Domain expertise across many industries

- With vast technology experience and deep public sector specific knowledge, we quickly create innovative solutions tailored to your goals, delivering outcomes to address the intricate challenges currently facing governments.
- Through our innovative delivery approach, true client partnerships and exceptional people, we design and deliver solutions that have dramatically increased user engagement and provide better citizen and customer experiences for us all.

We are the customer's partner first, the software vendor's second

Netcompany is a tech-agnostic IT solutions provider, and we are entirely independent – always opting for the precise mix of technologies that is optimal to your business.

With expertise in all modern technologies and industry-targeted digital tools, we guide you through your options, combining components and software with the goal of finding the right balance between needs, agility and operating costs.

What We Do – and How

Championing Digital Sovereignty and Responsible Digitalisation, we deliver end-to-end IT services – even where others couldn't.

End-to-end transformation delivery capability

A singular delivery model that sets us apart

Open platform approach

- Legacy-free solutions with full customer ownership
- Technology agnostic – customer needs is the only thing that dictates technology choices
- Reusable components and portfolio of future-proof platforms and products

Access to unique talent

- IT people leading IT people
- No knowledge gaps
- Interdisciplinary and cross-organisational teams
- Scalable project cell structure

Building digital maturity

- Highly collaborative, on-site development approach
- We share our expertise and educate your organisation
- We nurture your digital maturity and independence

Controlled agile delivery

- A perfect mix of waterfall and agile virtues
- Control and predictability in harmony with lean, continuous improvements and adaptation

Next-generation digital transformation

Platforms for the future

A platform is something to build on. It's a solid foundation. It's safe. It's re-usable. In short, it's a responsible way of doing IT.

Why Netcompany platforms?

■ Reliability from re-use

Our platform approach prioritises successful re-use, ensuring consistency and reliability for clients, and reducing development redundancy with cutting-edge technical platforms.

■ Reduced risk

Our meticulous documentation and use of proven platforms provide a high level of transparency and agility, ensuring timely delivery with reduced risks.

Netcompany Platforms

Easily customisable, rapidly deployable,
and AI-ready - for the futureproof business.

CONTROL TOWER

PULSE™ is a control tower for a real-time data ecosystem that allows businesses to share and act on a single source of truth.

It facilitates adaptable planning and forecasting in changing circumstances, breaking down silos and providing a single view of plan, execution and results.

PROCESS AND ADMINISTRATION

AMPLIO™ is our platform for regulated case management and process automation in highly compliant environments. It's a powerful tool for digitising and controlling complex processes, providing a single source of truth for all business executions.

DIGITAL POST & ARCHIVE

AMI™ is a secure platform that connects businesses and people. As a Digital Wallet, it offers a range of compliant 'my site' features like archive, profile, sign, and pay-as-a-service.

Additionally, AMI allows fast data and document exchange with other businesses.

GENERATIVE AI PLATFORM

EASLEY AI™ orchestrates and leverages existing AI models, quickly connecting them to your unique business data, tools, and processes, centralising and storing data securely within EASLEY – not with the model provider – to ensure full transparency and governance of AI.

The strategic benefits of our platforms

Industry shaping products

Our purpose-built products solve complex challenges in targeted business domains. They are the result of years of refinement, delivering the perfect balance of reliability, flexibility, and transparency.

Why Netcompany products?

■ You could settle for a standard product

Off-the-shelf IT products promise speed and low cost with minimal custom work. Yet they often fall short of meeting your unique needs – leading to integration issues and hidden expenses.

■ Or choose the better way

Our range of products is designed to match your specific requirements. They offer modular integration, one transparent price to eliminate surprises, and an open-source foundation.

■ In short –

A generic IT product might seem appealing at first, but its long-term drawbacks – limited flexibility, rising costs, and integration headaches—can add up. Our products deliver the reliability, adaptability, and transparency your business needs – the result of years of refinement.

Netcompany Products

TAXATION

SOLON TAX™ is our built for purpose commercial-off-the-shelf (COTS) product for taxpayer and revenue management operations and process automation in complex revenue authority environments.

CUSTOMS

ERMIS™ is a dedicated, self-contained, reusable, and integrated family of customs solutions, with continuously evolving capabilities designed to be the customs operations management system of choice for customs administrations.

SOCIAL SECURITY

PERSEUS™ is our purpose-built commercial off-the-shelf (COTS) product for employers, insured persons, social security revenues, pensions, and benefits management operations. It facilitates process automation in complex social security environments.

DIGITAL BANKING

DX4B™ is our leading-edge digital banking solution, offering mobile banking, web banking, open banking, and digital wallets with a focus on interoperability and scalability.

RISK ANALYSIS

LUMENUS™ is a next-gen risk analysis solution designed for the public sector, offering increased usability, seamless interoperability, and a modern technology stack.

■ Our products are to our platforms what specialised tools are to a general-purpose toolkit.

While the latter reuse components across industries, our products target specific industries or business processes.

Together, they maximise our ability to reuse software at scale.

Our customers are the ones to reap the benefits.

Greater reliability

Lower costs

Fast deployment

Simple, transparent pricing scheme
