Assuring the Resilience of the UK's National Infrastructure

Supporting the Strategic Road Network

The National Highways digital estate is a highly complex ecosystem, comprising 130 suppliers and 40 services.

Working as a trusted partner with National Highways since 2019, we have supported its Digital Services team to manage suppliers, reduce downtime, and deliver significant improvements to processes.

Streamlining UK-EU Trade with NCTS5

HM Revenue
& Customs

Netcompany's ERMIS solution replaced HMRC's 20-year-old legacy system with the **New Computerised Transit System Phase (NCTS)**.

The modernised, automated customs procedures for UK and EU traders improve efficiency and reduce waste.

Saving 600K+ hours in GP Surgery Administrative Work

Over 95% of **UK GP surgeries** are now processing 2.4+ million patient registrations through the NHS App.

Our work with NHS England has enabled the full digitalisation of the patient registration process, reducing what used to take weeks down to minutes.

Assuring National Security through Safe Modernisation

Home Office

We work with the **Home Office** to modernise critical national infrastructure, enhancing public safety.

Our expertise supports initiatives that bolster national security and Policing efforts, such as the NIAM (National Identity and Authentication Management) technology platform.

Migrating 47 Mission-Critical Applications to the Cloud

Ministry
of Defence

We worked with the **UK Ministry of Defence** to migrate 47 mission-critical applications to MODCloud, supporting over 330,000 military and civilian users.

This transformation strengthens security, reduces downtime, and enables future innovation.

Hybrid & Remote Working Design and Deployment Service

Netcompany provides Hybrid and Remote Working solutions to organisations that are looking to increase employee productivity through flexibility of home working or just simply provide a more secure service.

These include solutions such as Always on VPN, Azure Virtual Desktop, AWS Workspaces, and Windows and Microsoft 365.

Service Features

1. Requirements, scope, discovery, assessment, analysis, and definition.
2. Modern workplace, co-location / huddle opportunity with meeting room devices.
3. Enable multi-device remote / home working through virtual office environment.
4. Disaster Recovery and Business Continuity Planning.
5. Secure access to data using Cloud Virtual Desktops.
6. Seamless Remote Access integration to corporate networks.
7. Integrated multi-factor authentication increasing security.
8. Least-Privileged Access enforced through security policies.
9. Communication functionality including instant messaging, telephony, voicemail and conferencing.
10. Modern Endpoint management, security, compliance, collaboration, and productivity tools

Service Benefits

1. Securely access IT resources from anywhere on any device.
2. Location for employees no longer a restriction.
3. Support staff even when out of office
4. Improved Security as data is not distributed to devices.
5. Employees can use own devices reducing IT overheads.
6. Flexible Working to increase employee productivity.
7. Alleviate lack of physical access to equipment for business operations.
8. Enable a business continuity plan.
9. Eliminate Silos between employees
10. Promote Collaboration across multiple teams and departments.

Hybrid & Remote Working Design and Deployment Service

The Service

Netcompany provides Hybrid and Remote Working solutions to organisations that are looking to increase employee productivity through flexibility of home working or just simply provide a more secure service.

These include solutions such as Always on VPN, Cisco AnyConnect, Azure Virtual Desktop, AWS Workspaces, Citrix Cloud, and Windows 365

We work with our customers to understand their specific requirements, carry out thorough detailed assessment of the current situation which helps us Design, Implement the right solution to our clients.

The following services, are available based on the outcome of the assessment.

- Upgrade existing remote access solution
- Implement traditional VPN services
- Extend to Virtual Desktops/Applications
- Pay-as-you-Go Desktop-as-a-Service

What does it do?

Remote Working Service provides organisations to offer flexibility to its employees through Hybrid working scenarios in a secure and efficient manner.

By working with Netcompany, our services provide organisations a feature rich environment that allows for external collaboration, enhanced meeting experiences, flexible working, and a coherent and standardised approach to accessing business resources.

Designing a Hybrid and Remote Access environment also allows remote employees to access all business-critical apps securely and seamlessly from any location or device.

Ensures every employee has instant access to all the apps and tools they need to work based on their role within the company.

Hybrid & Remote Working Design and Deployment Service

How we do it

Netcompany use a tried a tested methodology for the design and implementation of remote working for our clients, refined over hundreds of successful installation and upgrade deliveries.

We help define the strategy, understand your problem statement and work with you to design a solution which is focused on meeting your specific needs using the appropriate technology across multiple types of technologies.

Assessment

Regular meetings and workshops with key stakeholders to determine how employees currently access systems, where information is stored such as in the cloud or within corporate network.

The objectives are then assessed to determine which solution to use and to address the technical requirements, or any specific regulatory/network/security requirements.

Design & Implementation

During this process, we work alongside your team, and with the information gathered in the Discovery phase, develop high level and detailed low-level design documentation.

When building the service, we look to demonstrate an environment that is ready for testing and ensure that it remains fit for purpose and resources are scaled appropriately.

Pilot

Following design, a Pilot (or Early Adopter) phase is held to ensure that the service can deliver to the expectations, such as identity integration, messaging flow, collaboration with external parties and technical integration operates as intended.

This is done by piloting the service on a cross section of the user base. The approach for migrating the users and data to the service will also be fine-tuned during this process.

Feedback is critical and we work with the users to ensure the service remain on track to meet the agree objectives. Once feedback is received and the Pilot is signed off, the project can then move on.

Deployment

A transition plan is produced which further shapes the migration approach. Each group of users is appropriately scheduled to deliver the most effective migration from a user perspective.

User perception is critical in any migration project and Netcompany has found that by keeping close to users with regular communications and providing feedback channels the success of the project is greatly enhanced.

How we work

A photograph of a group of people in a meeting or conference. In the foreground, a man with a beard and short blonde hair, wearing a white shirt, is smiling and looking towards the left. Behind him, another man in a blue shirt is partially visible. To the right, a woman with long brown hair, wearing a grey jacket, is also looking towards the left. The background is blurred, showing other people in the room. The overall lighting is warm and professional.

We empower societies, companies and institutions to take control of their processes and data.

Dedicated to a Greener, Fairer Future

- Netcompany is more than a business; we're a community of employees, customers and partners committed to a sustainable and fair society.
- When working towards the Social Value Quality Mark, we developed a set of seven pledges. These support our alignment with the United Nations' Sustainable Development Goals and the UK Government's Social Value Model. Furthermore, they underpin the development of our social and environmental impact initiatives.
- We are proud to be the winner of awards and accolades from our work and contribution to social value creation and community well-being.

Social Value in 2024

■ Communities

Netcompany partners with schools, charities and SMEs to build digital skills, improve access to technology and create inclusive opportunities. Through volunteering, mentoring and targeted programmes, Netcompany reached **10,000 people** across **480 hours of volunteering** in 2024, running and contributing to events with Ahead partnership, Rebel Business School and more. Netcompany helped local areas strengthen in resilience, employability and long-term economic growth with the creation of **201 FTE jobs** across London, Birmingham, Leeds and Edinburgh of which 100% are **paid real living wage**.

■ People

Netcompany invests in our people through inclusive recruitment, apprenticeships and continuous learning. We delivered **7,000 hours of digital upskilling** through our dedicated Academy in areas of digital, management and personal development. We support underrepresented groups into meaningful careers, with **4 new apprentices** who are supported by our ERGs (Women, Multicultural, Veterans, LGBTQ, Neurodiversity). Netcompany has achieved demographic representation above the industry average in areas such as ethnic minority, who make up **46% of our workforce**. We promote fair pay, wellbeing and progression, delivering **180 hours of wellbeing intervention** in 2024 through access to specialists and webinars targeting mental and physical health, and financial management.

■ Environment

Netcompany is reducing carbon emissions through an **EV scheme adopted by 13% of our staff**, promoting green IT through project Green Team Charters and tackling tech waste through our partnership with Good Things Foundation. We embed sustainable practices in delivery and supply chains, ensuring our ecosystems meet minimum requirements and support biodiversity volunteering with the NHS.

A singular delivery model that sets us apart

Open platform approach

- Legacy-free solutions with full customer ownership
- Technology agnostic – customer needs is the only thing that dictates technology choices
- Reusable components and portfolio of future-proof platforms and products

Access to unique talent

- IT people leading IT people
- No knowledge gaps
- Interdisciplinary and cross-organisational teams
- Scalable project cell structure

Building digital maturity

- Highly collaborative, on-site development approach
- We share our expertise and educate your organisation
- We nurture your digital maturity and independence

Controlled agile delivery

- A perfect mix of waterfall and agile virtues
- Control and predictability in harmony with lean, continuous improvements and adaptation

Next-generation digital transformation

Platforms for the future

A platform is something to build on. It's a solid foundation. It's safe. It's re-usable. In short, it's a responsible way of doing IT.

Why Netcompany platforms?

■ Reliability from re-use

Our platform approach prioritises successful re-use, ensuring consistency and reliability for clients, and reducing development redundancy with cutting-edge technical platforms.

■ Reduced risk

Our meticulous documentation and use of proven platforms provide a high level of transparency and agility, ensuring timely delivery with reduced risks.

Netcompany Platforms

Easily customisable, rapidly deployable,
and AI-ready - for the futureproof business.

CONTROL TOWER

PULSE™ is a control tower for a real-time data ecosystem that allows businesses to share and act on a single source of truth.

It facilitates adaptable planning and forecasting in changing circumstances, breaking down silos and providing a single view of plan, execution and results.

PROCESS AND ADMINISTRATION

AMPLIO™ is our platform for regulated case management and process automation in highly compliant environments. It's a powerful tool for digitising and controlling complex processes, providing a single source of truth for all business executions.

DIGITAL POST & ARCHIVE

AMI™ is a secure platform that connects businesses and people. As a Digital Wallet, it offers a range of compliant 'my site' features like archive, profile, sign, and pay-as-a-service.

Additionally, AMI allows fast data and document exchange with other businesses.

GENERATIVE AI PLATFORM

EASLEY AI™ orchestrates and leverages existing AI models, quickly connecting them to your unique business data, tools, and processes, centralising and storing data securely within EASLEY – not with the model provider – to ensure full transparency and governance of AI.

The strategic benefits of our platforms

Industry shaping products

Our purpose-built products solve complex challenges in targeted business domains. They are the result of years of refinement, delivering the perfect balance of reliability, flexibility, and transparency.

Why Netcompany products?

■ You could settle for a standard product

Off-the-shelf IT products promise speed and low cost with minimal custom work. Yet they often fall short of meeting your unique needs – leading to integration issues and hidden expenses.

■ Or choose the better way

Our range of products is designed to match your specific requirements. They offer modular integration, one transparent price to eliminate surprises, and an open-source foundation.

■ In short –

A generic IT product might seem appealing at first, but its long-term drawbacks – limited flexibility, rising costs, and integration headaches—can add up. Our products deliver the reliability, adaptability, and transparency your business needs – the result of years of refinement.

Netcompany Products

TAXATION

SOLON TAX™ is our built for purpose commercial-off-the-shelf (COTS) product for taxpayer and revenue management operations and process automation in complex revenue authority environments.

CUSTOMS

ERMIS™ is a dedicated, self-contained, reusable, and integrated family of customs solutions, with continuously evolving capabilities designed to be the customs operations management system of choice for customs administrations.

SOCIAL SECURITY

PERSEUS™ is our purpose-built commercial off-the-shelf (COTS) product for employers, insured persons, social security revenues, pensions, and benefits management operations. It facilitates process automation in complex social security environments.

DIGITAL BANKING

DX4B™ is our leading-edge digital banking solution, offering mobile banking, web banking, open banking, and digital wallets with a focus on interoperability and scalability.

RISK ANALYSIS

LUMENUS™ is a next-gen risk analysis solution designed for the public sector, offering increased usability, seamless interoperability, and a modern technology stack.

■ Our products are to our platforms what specialised tools are to a general-purpose toolkit.

While the latter reuse components across industries, our products target specific industries or business processes.

Together, they maximise our ability to reuse software at scale.

Our customers are the ones to reap the benefits.

Greater reliability

Lower costs

Fast deployment

Simple, transparent pricing scheme
