EASLEY AI –Generative AI Service

Based on customer needs, we may sell Easley AI as a flexible platform upon which you build your desired additional features and use cases, or alternatively as a product, in which case you receive features and updates via the Easley AI product roadmap.

There is a single one-off either entry, or exit fee, as per customer decision of £55,000.00.
The baseline monthly fee is £16,000.00 and covers an unlimited number of internal and external users.

Where additional development and implementation costs are incurred, these can be commercialised separately by purchasing our "Platform Implementation" service listed under Lot 3. These costs are derived from the size and scope of the requirements needed by the authority.

ASSUMPTIONS AND CAVEATS	SERVICES AT EXTRA COST
• Monthly fee excludes the target deployment infrastructure and/or the cloud hosting components • Monthly fee includes maintenance and support services • Pricing does not include VAT • Pricing does not include foundational AI models • RPI applies • Customer is responsible for end user devices • Customer is responsible for appropriate connectivity (including VPN to cloud) for back-office users • Two environments, PRODUCTION and TESTING, are offered with the Cloud implementation • Implementation and third-party integration costs are not included in the pricing	• Implementation services (GAP analysis for additional custom functionality, configuration and/or interfaces) • Data migration services • UAT activities • implementation of integrations to third-party services/platforms • Additional technical support services • Additional operational support • End-of-contract activities, customized plan and data extraction • Online ticketing system • Additional services are charged according to Netcompany rate card
