Overview

Beyond provide fixed price Cloud training packages as follows:

Introduction to Oracle Analytics Cloud workshop – move to the cloud

A 1-day workshop looking in overview at Oracle Analytics Cloud and workshopping a strategy for moving to the cloud from an existing on-premises solution.

Self-Service Analytics Day

A 1-day workshop session designed for End-user consumers, business analysts and first-time OAC users to show how to interrogate data using the latest version of Oracle Analytics for up to 8 users.

- Introduction to Oracle Analytics Cloud & modern dashboarding standards.
- How to create, format (including colour coding), and filter visualizations Add your own data and use the AI Assistant and Insights.
- Adding calculations and parameters
- How to discuss requirements with internal IT
- Practical exercises for “real-world” scenarios.

At the end, users can confidently explore and present their own data without needing constant IT support.

Analytics - “Level up” - more advanced Oracle Analytics course.

A 1-day advanced visual analytics workshop for more experienced users ready to go beyond the essentials who want to deliver more sophisticated and impactful analytics.

- Advanced calculations techniques, including parameter driven metrics.
- Period on Period analytics and advanced time and expression filters.
- Deeper dive into OAC's AI/ML capabilities.
- Standardisation and Governance.
- Bridging the gap between end users and IT
- Exploration of new and emerging new features from OAC's latest releases.
- Produce richer, more insightful dashboards that drive actionable business decisions.

Features

- Onsite and remote training
- Introduction to Oracle Analytics Cloud
- Self-Service Techniques for developers and end-users
- More advanced enablement for experienced users

Benefits

- Gain knowledge of the latest technology with our custom training to boost operational effectivity

- Attend remote or on-site courses, to suit your enablement needs
- Low minimum numbers of trainees reduced costs for training

On-boarding and Off-boarding

At the forefront of our consulting engagement model is ensuring the requirements, objectives and scope of an engagement are mutually understood and documented prior to any project commencing. A thorough handover of project materials and knowledge transfer to in-house staff is carried out at the end of any project.

Pricing

See the pricing document.

Ordering and Invoicing Process

Ordering is processed according to the terms agreed at the time of acceptance. Typically, this will involve client acceptance by way of purchase order from a written proposal for the work stating deliverables, costs, and timescales.

Invoices will be issued and payable in advance of training being carried out.

Beyond's payment terms are 30 calendar days from the date of the invoice.

Termination Terms

These are included in our Terms and Conditions document.
