Application License Pricing

Cloud Application	Min Annual Cost (Per Unit)
Smart Cloud Controller for Oracle Cloud Infrastructure	£15,000

One Off Items	One-Off Cost
Costing Plan	£6,000 *
On-Boarding & Initial Plan Setup	£6,000 *

*Note for large cloud estates requiring more than 6 days on either a costing plan or on-boarding then per-day pricing rates for services will be used

Service Credit Pricing

The pricing of this product is primarily based on the consumption of credits however; there is a minimum annual cost that must be met before service credit pricing commences. A service credit is consumed each time the scheduler performs an **action service** such as starting, stopping, restarting, or resizing a cloud instance.

The customer will commit to purchasing a set number of credits each month for a minimum term of 12 months. Each month 1/12th of the credits will need to be consumed or will be forfeited for that month. The credits are billed in advance each month.

If the customer requires help building a usage plan, there is an on-boarding charge . Whilst the pricing is based on action credits there is a minimum charge of £15,000 per annum for this service.

Scheduler Credit Volume Bands and Costs		
Annual Volume of Action Credits	1-4000	>4000
Action Service	£3.60	£3.00

Customisations and Additional Support

If customisations or additional support services are required, the per-day pricing rates for services are:

Role	Level	Maximum Day Rate (UK)
Development operations (DevOps) engineer	Lead DevOps engineer rate	£900

All costs are exclusive of VAT and Expenses budgeted at 10%

Beyond Systems' standard terms and conditions apply
