

Cloud Management Services

About Scott Logic

At Scott Logic, we build user-focused software that transforms the performance of our public and private sector clients. From citizen-centred service design to digital transformation projects, our consultants combine innovation, experience and pragmatism to deliver measurable results with every project.

Our onshore, UK delivery model allows us to attract and retain highly skilled technologists, all of whom are permanent employees, ensuring our clients receive the highest quality of service.

Our clients

Over the last 20 years and more, Scott Logic has built a strong reputation as the partner of choice for many clients across the Public Sector, as well as financial services, retail banking, healthcare, private equity, and the energy sector, including:

Our cloud services

Scott Logic offers consulting services across a broad range of capabilities, including:

-  **AI Accelerator**
-  **Architecture, Migration and Platform Engineering for Cloud**
-  **API Platform**
-  **Service Delivery for Cloud**
-  **Service Design for Cloud**
-  **Cloud Sustainability**
-  **Legacy Modernisation**

Working with Scott Logic

Scott Logic employs only permanent, UK-based technologists who share and embody our guiding values of passion, respect, excellence, collaboration and professionalism. In this way, we ensure that you, as our client, receive the highest quality of service from genuine teams. All of our engagements have Principal-level oversight and Director-level sponsorship, providing clear lines of communication and optimal collaboration. This means we build long-term, enduring partnerships, which drive value and enable our clients to transform their businesses.

Cloud Management Services

Our ISO 27001 Service Management function takes the pain, complexity and overhead of managing cloud hosting away from clients by providing resilient and repeatable infrastructure and services, including: cost optimisation and management; capacity management; performance management; and scalability optimisation, sustainability optimisation and management, whilst all adhering to ITIL principles.

Features

- ISO 27001-certified SLA and governance for cloud operations
- Cost analytics and optimisation for financial efficiency
- Capacity and scalability management for dynamic workloads
- Security event and vulnerability management integrated seamlessly
- Managed disaster recovery for rapid service restoration
- Advanced monitoring and alerting for proactive issue detection
- Data logging tools and management
- Data Warehousing and Data Ingestion management
- Performance management across applications and infrastructure layers
- Sustainability optimisation to reduce environmental impact of cloud

Benefits

- Guaranteed high availability and resilience of cloud services
- Clear visibility and control over cloud spend and usage
- Confidence in secure, compliant cloud operations at scale
- Rapid recovery ensures minimal downtime during disruptions
- Improved performance and scalability for evolving business needs
- Reduced operational complexity through expert management and automation
- Deep insight into health of services
- Deep insight into warnings and errors etc.
- Access to data in a timely and appropriately aggregated fashion
- Freedom to focus on strategic priorities, not cloud overhead

Interested in partnering with Scott Logic?

At Scott Logic, we love difficult. Our UK-based permanently employed consultants collaborate with some of the world's biggest organisations, providing a pragmatic approach to designing, developing and supporting cloud services that deliver measurable value.
