

# Production-Ready AI Advisory Services

## About Scott Logic

At Scott Logic, we build user-focused software that transforms the performance of our public and private sector clients. From citizen-centred service design to digital transformation projects, our consultants combine innovation, experience and pragmatism to deliver measurable results with every project.

Our onshore, UK delivery model allows us to attract and retain highly skilled technologists, all of whom are permanent employees, ensuring our clients receive the highest quality of service.

**Certified**

**Corporation**

**2005** founded

**400+** people

**6** offices

**25+** clients

## Our clients

Over the last 20 years and more, Scott Logic has built a strong reputation as the partner of choice for many clients across the Public Sector, as well as financial services, retail banking, healthcare, private equity, and the energy sector, including:

## Our cloud services

Scott Logic offers consulting services across a broad range of capabilities, including:

-  **AI Accelerator**
-  **Architecture, Migration and Platform Engineering for Cloud**
-  **API Platform**
-  **Service Delivery for Cloud**
-  **Service Design for Cloud**
-  **Cloud Sustainability**
-  **Legacy Modernisation**

## Working with Scott Logic

Scott Logic employs only permanent, UK-based technologists who share and embody our guiding values of passion, respect, excellence, collaboration and professionalism. In this way, we ensure that you, as our client, receive the highest quality of service from genuine teams. All of our engagements have Principal-level oversight and Director-level sponsorship, providing clear lines of communication and optimal collaboration. This means we build long-term, enduring partnerships, which drive value and enable our clients to transform their businesses.

# Production-Ready AI Advisory Services

We help you navigate from AI experimentation to production reality through engineering-led advisory. We understand the unique challenges with this technology – for example, developing and testing non-deterministic systems – and will bring our insights to bear so that you can take your prototypes into production safely, securely, and with confidence.

## Features

- Design production architecture with an emphasis on non-deterministic system management
- Design architecture ensuring integration with existing data stores and systems
- Create security patterns and controls for AI-specific threats and risks
- Establish testing frameworks for probabilistic outputs/non-deterministic behaviour
- Design validation approaches using expert benchmarks
- Implement and configure telemetry and observability infrastructure
- Assess monitoring and incident response capabilities, ensuring operational readiness
- Model and optimise operating costs
- Provide documentation and knowledge transfer

## Benefits

- Risk vs cost evaluation of prototype implementation as production foundation
- Pre-release security sanity checks are embedded
- Content filtering and guardrails are established
- Staged governance appropriate to organisational maturity level
- Human verification remains essential, particularly for business logic validation
- Model selection and deployment approach aligned to cost/risk appetite
- Your team is upskilled and left self-sufficient

# Interested in partnering with Scott Logic?

At Scott Logic, we love difficult. Our UK-based permanently employed consultants collaborate with some of the world's biggest organisations, providing a pragmatic approach to designing, developing and supporting cloud services that deliver measurable value.
