

Cloud Data Engineering

About Scott Logic

At Scott Logic, we build user-focused software that transforms the performance of our public and private sector clients. From citizen-centred service design to digital transformation projects, our consultants combine innovation, experience and pragmatism to deliver measurable results with every project.

Our onshore, UK delivery model allows us to attract and retain highly skilled technologists, all of whom are permanent employees, ensuring our clients receive the highest quality of service.

Our clients

Over the last 20 years and more, Scott Logic has built a strong reputation as the partner of choice for many clients across the Public Sector, as well as financial services, retail banking, healthcare, private equity, and the energy sector, including:

Our cloud services

Scott Logic offers consulting services across a broad range of capabilities, including:

-  **AI Accelerator**
-  **Architecture, Migration and Platform Engineering for Cloud**
-  **API Platform**
-  **Service Delivery for Cloud**
-  **Service Design for Cloud**
-  **Cloud Sustainability**
-  **Legacy Modernisation**

Working with Scott Logic

Scott Logic employs only permanent, UK-based technologists who share and embody our guiding values of passion, respect, excellence, collaboration and professionalism. In this way, we ensure that you, as our client, receive the highest quality of service from genuine teams. All of our engagements have Principal-level oversight and Director-level sponsorship, providing clear lines of communication and optimal collaboration. This means we build long-term, enduring partnerships, which drive value and enable our clients to transform their businesses.

Cloud Data Engineering

We design, build and modernise cloud data platforms that securely ingest, process and serve high-quality data. Our AWS and Azure certified consultants create scalable data engineering foundations aligned to GDS standards, enabling reliable analytics, real-time insight and AI adoption.

Features

- Cloud data platforms on AWS and Azure
- Secure data ingestion and pipeline development
- Batch and real-time data processing solutions
- Event-driven and streaming data architectures
- Data migration from legacy platforms
- Deep expertise in Spark, Kafka, DataBricks, Snowflake, Cloudera
- APIs aligned to GDS data standards
- Performance, scalability and resilience testing
- Infrastructure as code and automation
- Knowledge transfer and team upskilling

Benefits

- Reliable, scalable data platforms
- Improved data quality and consistency
- Faster access to trusted insights
- Reduced operational and technical risk
- Platforms aligned to GDS standards
- Cloud-native, future-proof architectures
- Independent, vendor-agnostic advice
- Better value from existing data
- Enables advanced analytics and AI
- Builds long-term internal capability

Interested in partnering with Scott Logic?

At Scott Logic, we love difficult. Our UK-based permanently employed consultants collaborate with some of the world's biggest organisations, providing a pragmatic approach to designing, developing and supporting cloud services that deliver measurable value.
