

Data Strategy Services

About Scott Logic

At Scott Logic, we build user-focused software that transforms the performance of our public and private sector clients. From citizen-centred service design to digital transformation projects, our consultants combine innovation, experience and pragmatism to deliver measurable results with every project.

Our onshore, UK delivery model allows us to attract and retain highly skilled technologists, all of whom are permanent employees, ensuring our clients receive the highest quality of service.

Our clients

Over the last 20 years and more, Scott Logic has built a strong reputation as the partner of choice for many clients across the Public Sector, as well as financial services, retail banking, healthcare, private equity, and the energy sector, including:

Our cloud services

Scott Logic offers consulting services across a broad range of capabilities, including:

-  **AI Accelerator**
-  **Architecture, Migration and Platform Engineering for Cloud**
-  **API Platform**
-  **Service Delivery for Cloud**
-  **Service Design for Cloud**
-  **Cloud Sustainability**
-  **Legacy Modernisation**

Working with Scott Logic

Scott Logic employs only permanent, UK-based technologists who share and embody our guiding values of passion, respect, excellence, collaboration and professionalism. In this way, we ensure that you, as our client, receive the highest quality of service from genuine teams. All of our engagements have Principal-level oversight and Director-level sponsorship, providing clear lines of communication and optimal collaboration. This means we build long-term, enduring partnerships, which drive value and enable our clients to transform their businesses.

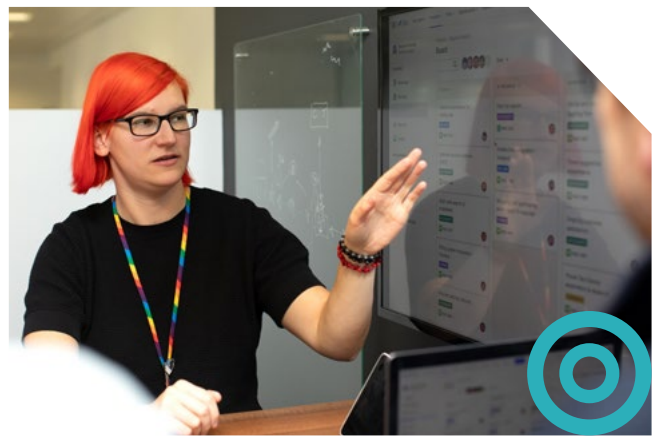

Data Strategy Services

We help public sector organisations define and deliver effective data strategies. Working collaboratively, we assess current data capabilities, define a clear vision and success measures, and produce actionable roadmaps covering data architecture, governance, platforms and operating models, aligned to organisational goals and GDS standards.

Features

- Stakeholder and user research to capture data needs
- Audit of data assets, platforms and data flows
- Assessment of data engineering and analytics maturity
- Definition of data vision, principles and objectives
- Measurable success criteria and KPIs
- Actionable, prioritised data strategy roadmap
- Data governance and ownership model design
- Technology and platform options evaluation
- Alignment with GDS data and API standards
- AWS and Azure certified data consultants

Benefits

- Clear, shared data vision and strategic direction
- Evidence-based roadmap for data transformation
- Improved data quality, governance and trust
- Better use of existing data and platforms
- Reduced duplication, risk and technical debt
- Alignment with government data standards
- Informed cloud and technology decisions
- Stronger foundations for analytics and AI
- Increased organisational data maturity
- Enables sustainable, data-driven decision-making

Interested in partnering with Scott Logic?

At Scott Logic, we love difficult. Our UK-based permanently employed consultants collaborate with some of the world's biggest organisations, providing a pragmatic approach to designing, developing and supporting cloud services that deliver measurable value.
