

Test Automation Services

About Scott Logic

At Scott Logic, we build user-focused software that transforms the performance of our public and private sector clients. From citizen-centred service design to digital transformation projects, our consultants combine innovation, experience and pragmatism to deliver measurable results with every project.

Our onshore, UK delivery model allows us to attract and retain highly skilled technologists, all of whom are permanent employees, ensuring our clients receive the highest quality of service.

Our clients

Over the last 20 years and more, Scott Logic has built a strong reputation as the partner of choice for many clients across the Public Sector, as well as financial services, retail banking, healthcare, private equity, and the energy sector, including:

Our cloud services

Scott Logic offers consulting services across a broad range of capabilities, including:

-  **AI Accelerator**
-  **Architecture, Migration and Platform Engineering for Cloud**
-  **API Platform**
-  **Service Delivery for Cloud**
-  **Service Design for Cloud**
-  **Cloud Sustainability**
-  **Legacy Modernisation**

Working with Scott Logic

Scott Logic employs only permanent, UK-based technologists who share and embody our guiding values of passion, respect, excellence, collaboration and professionalism. In this way, we ensure that you, as our client, receive the highest quality of service from genuine teams. All of our engagements have Principal-level oversight and Director-level sponsorship, providing clear lines of communication and optimal collaboration. This means we build long-term, enduring partnerships, which drive value and enable our clients to transform their businesses.

Test Automation Services

Technology-agnostic design and delivery of test automation for cloud services. Our test engineers create maintainable, risk-led automated checks integrated into CI/CD pipelines, improving feedback speed, release confidence and service quality across AWS and Azure-hosted platforms.

Features

- Risk-led automated test strategy and coverage design
- Context-driven selection of tools and test types
- Bespoke automation frameworks aligned to service architecture
- CI/CD pipeline integration with quality gates
- API, UI, AI, contract and accessibility test automation
- Containerised and isolated test execution environments
- Automated monitoring and reporting of test outcomes
- Code-reviewed, version-controlled automation assets
- Cloud-native execution on AWS and Azure
- Knowledge transfer to in-house delivery teams

Benefits

- Faster feedback on service quality
- Reduced regression and release risk
- Improved confidence in frequent deployments
- Lower long-term testing and maintenance costs
- Early detection of defects and integration issues
- Scalable testing aligned to service growth
- Clear visibility of test coverage and results
- Automation maintainable by in-house teams
- Supports GDS quality assurance principles
- Shorter lead time from change to production

Interested in partnering with Scott Logic?

At Scott Logic, we love difficult. Our UK-based permanently employed consultants collaborate with some of the world's biggest organisations, providing a pragmatic approach to designing, developing and supporting cloud services that deliver measurable value.
