

Performance Testing Services

About Scott Logic

At Scott Logic, we build user-focused software that transforms the performance of our public and private sector clients. From citizen-centred service design to digital transformation projects, our consultants combine innovation, experience and pragmatism to deliver measurable results with every project.

Our onshore, UK delivery model allows us to attract and retain highly skilled technologists, all of whom are permanent employees, ensuring our clients receive the highest quality of service.

Our clients

Over the last 20 years and more, Scott Logic has built a strong reputation as the partner of choice for many clients across the Public Sector, as well as financial services, retail banking, healthcare, private equity, and the energy sector, including:

Our cloud services

Scott Logic offers consulting services across a broad range of capabilities, including:

-  **AI Accelerator**
-  **Architecture, Migration and Platform Engineering for Cloud**
-  **API Platform**
-  **Service Delivery for Cloud**
-  **Service Design for Cloud**
-  **Cloud Sustainability**
-  **Legacy Modernisation**

Working with Scott Logic

Scott Logic employs only permanent, UK-based technologists who share and embody our guiding values of passion, respect, excellence, collaboration and professionalism. In this way, we ensure that you, as our client, receive the highest quality of service from genuine teams. All of our engagements have Principal-level oversight and Director-level sponsorship, providing clear lines of communication and optimal collaboration. This means we build long-term, enduring partnerships, which drive value and enable our clients to transform their businesses.

Performance Testing Services

Technology-agnostic strategy and implementation of performance, load, stress, volume, soak and scalability testing for cloud-based applications. We help you to deliver robust and reliable software whilst embedding performance testing best practices across the SDLC. Our context-driven approach combines automated and exploratory testing techniques.

Features

- Collaborate with you to assess performance related risks
- Context driven and risk-based approach to performance testing
- Performance testing tool research, evaluation and selection
- Performance test design, implementation and execution including migration where required
- Robust, scalable, maintainable, extensible and fast performance tests
- Embed performance testing best practices suitable to the organisation's context

Benefits

- Early identification of performance related risks enables better decision making
- High levels of collaboration ensure high quality products and services
- Operational improvements due to less downtime of systems
- Increase in quality, decrease in cost via testing process optimisation
- Repeatable tests for performance
- Automated performance tests integrated with CI/CD pipelines

Interested in partnering with Scott Logic?

At Scott Logic, we love difficult. Our UK-based permanently employed consultants collaborate with some of the world's biggest organisations, providing a pragmatic approach to designing, developing and supporting cloud services that deliver measurable value.
