

# Context-Driven Testing Services

## About Scott Logic

At Scott Logic, we build user-focused software that transforms the performance of our public and private sector clients. From citizen-centred service design to digital transformation projects, our consultants combine innovation, experience and pragmatism to deliver measurable results with every project.

Our onshore, UK delivery model allows us to attract and retain highly skilled technologists, all of whom are permanent employees, ensuring our clients receive the highest quality of service.

**Certified**

**Corporation**

**2005** founded

**400+** people

**6** offices

**25+** clients

## Our clients

Over the last 20 years and more, Scott Logic has built a strong reputation as the partner of choice for many clients across the Public Sector, as well as financial services, retail banking, healthcare, private equity, and the energy sector, including:

## Our cloud services

Scott Logic offers consulting services across a broad range of capabilities, including:

-  **AI Accelerator**
-  **Architecture, Migration and Platform Engineering for Cloud**
-  **API Platform**
-  **Service Delivery for Cloud**
-  **Service Design for Cloud**
-  **Cloud Sustainability**
-  **Legacy Modernisation**

## Working with Scott Logic

Scott Logic employs only permanent, UK-based technologists who share and embody our guiding values of passion, respect, excellence, collaboration and professionalism. In this way, we ensure that you, as our client, receive the highest quality of service from genuine teams. All of our engagements have Principal-level oversight and Director-level sponsorship, providing clear lines of communication and optimal collaboration. This means we build long-term, enduring partnerships, which drive value and enable our clients to transform their businesses.

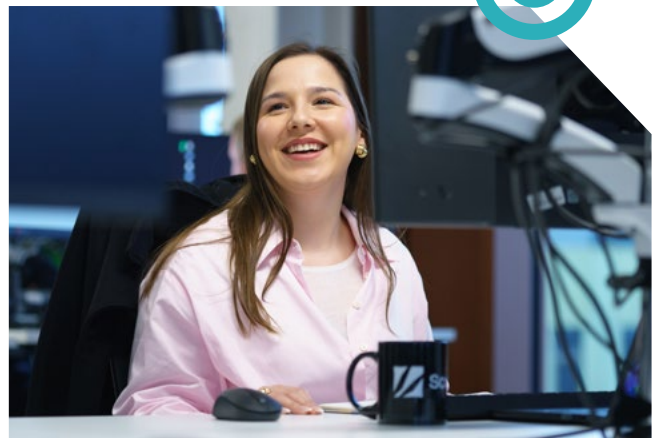

# Context-Driven Testing Services

Implementing and executing robust testing strategies for cloud solutions to ensure the delivery of high-quality software, both functional and non-functional (including performance, resilience, disaster recovery, compatibility and security testing).

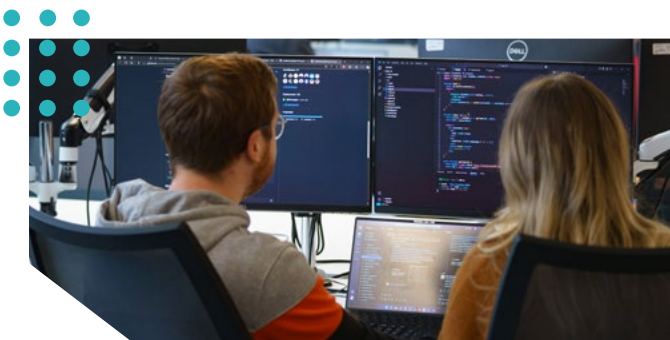

## Features

- Context-driven and risk-based approach to testing
- Collaborating with you to assess technical risks to digital products
- Working with you to develop a shared understanding of quality
- Designing, implementing and socialising comprehensive testing strategies
- Tailored testing approaches including automation alongside exploratory techniques
- Tool selection and implementation including migration where required
- Instigation of testing early, working to uncover information up front
- Embedded Test Engineers who work alongside Developers
- Early and frequent feedback throughout the SDLC

## Benefits

- Early identification of risk enables better decision making
- Holistic approach ensures consistency and drives high quality across projects
- High levels of collaboration ensure high quality products and services
- Reduction in time and budget leveraged from automation testing
- Operational improvements due to less downtime of systems
- Improved testability of services enables rapid and safe changes
- Increase in quality, decrease in cost via testing process optimisation

# Interested in partnering with Scott Logic?

At Scott Logic, we love difficult. Our UK-based permanently employed consultants collaborate with some of the world's biggest organisations, providing a pragmatic approach to designing, developing and supporting cloud services that deliver measurable value.
