

Cloud Sustainability Services

About Scott Logic

At Scott Logic, we build user-focused software that transforms the performance of our public and private sector clients. From citizen-centred service design to digital transformation projects, our consultants combine innovation, experience and pragmatism to deliver measurable results with every project.

Our onshore, UK delivery model allows us to attract and retain highly skilled technologists, all of whom are permanent employees, ensuring our clients receive the highest quality of service.

Our clients

Over the last 20 years and more, Scott Logic has built a strong reputation as the partner of choice for many clients across the Public Sector, as well as financial services, retail banking, healthcare, private equity, and the energy sector, including:

Our cloud services

Scott Logic offers consulting services across a broad range of capabilities, including:

-  **AI Accelerator**
-  **Architecture, Migration and Platform Engineering for Cloud**
-  **API Platform**
-  **Service Delivery for Cloud**
-  **Service Design for Cloud**
-  **Cloud Sustainability**
-  **Legacy Modernisation**

Working with Scott Logic

Scott Logic employs only permanent, UK-based technologists who share and embody our guiding values of passion, respect, excellence, collaboration and professionalism. In this way, we ensure that you, as our client, receive the highest quality of service from genuine teams. All of our engagements have Principal-level oversight and Director-level sponsorship, providing clear lines of communication and optimal collaboration. This means we build long-term, enduring partnerships, which drive value and enable our clients to transform their businesses.

Cloud Sustainability Services

We help public sector organisations design, assess and improve the environmental, social and economic sustainability of digital services. Using evidence-led methods, we measure impacts across the software lifecycle and provide practical guidance to reduce carbon, cost and risk while supporting long-term service resilience.

Features

- Assess sustainability impacts across the full digital service lifecycle
- Measure carbon and resource impacts using recognised standards
- Identify environmental, social, financial and operational trade-offs
- Align digital services with GDS sustainability principles
- Map technology estates to identify highest-impact improvement opportunities
- Provide evidence-based recommendations to reduce carbon, cost and risk
- Embed sustainability into delivery, governance and decision-making processes
- Enable automated monitoring and reporting of sustainability metrics
- Facilitate workshops to define sustainability goals and priorities
- Create bespoke sustainability frameworks tailored to organisational context

Benefits

- Sustainability embedded from service design through to live operation
- Clear understanding of digital services' environmental impact
- Data-driven prioritisation of highest-value sustainability improvements
- Reduced cloud and technology costs through efficient design
- Improved compliance with government sustainability expectations
- Increased resilience and maintainability of digital services
- Reduced duplication and inefficiency across technology estates
- Improved visibility of total cost of ownership
- Clear roadmap from current to future sustainable state
- Increased sustainability capability and confidence within teams

Interested in partnering with Scott Logic?

At Scott Logic, we love difficult. Our UK-based permanently employed consultants collaborate with some of the world's biggest organisations, providing a pragmatic approach to designing, developing and supporting cloud services that deliver measurable value.
