

Cloud Alpha Technical Validation Services

About Scott Logic

At Scott Logic, we build user-focused software that transforms the performance of our public and private sector clients. From citizen-centred service design to digital transformation projects, our consultants combine innovation, experience and pragmatism to deliver measurable results with every project.

Our onshore, UK delivery model allows us to attract and retain highly skilled technologists, all of whom are permanent employees, ensuring our clients receive the highest quality of service.

Our clients

Over the last 20 years and more, Scott Logic has built a strong reputation as the partner of choice for many clients across the Public Sector, as well as financial services, retail banking, healthcare, private equity, and the energy sector, including:

Our cloud services

Scott Logic offers consulting services across a broad range of capabilities, including:

-  **AI Accelerator**
-  **Architecture, Migration and Platform Engineering for Cloud**
-  **API Platform**
-  **Service Delivery for Cloud**
-  **Service Design for Cloud**
-  **Cloud Sustainability**
-  **Legacy Modernisation**

Working with Scott Logic

Scott Logic employs only permanent, UK-based technologists who share and embody our guiding values of passion, respect, excellence, collaboration and professionalism. In this way, we ensure that you, as our client, receive the highest quality of service from genuine teams. All of our engagements have Principal-level oversight and Director-level sponsorship, providing clear lines of communication and optimal collaboration. This means we build long-term, enduring partnerships, which drive value and enable our clients to transform their businesses.

Cloud Alpha Technical Validation Services

Our Cloud Alpha Technical Validation Services assess the feasibility, risks and constraints of proposed cloud services during Alpha. We validate technical approaches through targeted prototyping, testing and user feedback, providing evidence-based recommendations, assurance and clear outcomes to support confident progression into Beta.

Features

- Build and testing of technical prototypes identified during discovery
- Planning and execution of user testing activities
- Analysis of user testing feedback and observations
- Report concluding alpha outcomes and proposed solutions for beta
- Agile alpha phase governance and risk management
- Exploring technical feasibility to uncover functional and non-functional requirements
- User-centred evaluation of cloud service design approaches
- Collaboration with SMEs to clarify business use cases and journeys
- Alpha assessment support and guidance

Benefits

- Proposed beta solution defined and understood
- Shared understanding of business benefits
- De-risked solution to take into beta
- Evidence-based user insights to support improved service uptake
- Updated service roadmap to reflect learnings
- Improved understanding of dependencies and constraints
- Improved understanding of functional and non-functional requirements
- Confidence in service viability and compliance with standards
- Services aligned with Government Digital Service guidance
- Services aligned with Digital Scotland Service Standard guidance

Interested in partnering with Scott Logic?

At Scott Logic, we love difficult. Our UK-based permanently employed consultants collaborate with some of the world's biggest organisations, providing a pragmatic approach to designing, developing and supporting cloud services that deliver measurable value.
