

SERVICE OVERVIEW

Roq offers Quality Engineering Testing services to enhance your technical testing capabilities. We provide service virtualisation implementation (stubs/driver creation and configuration) through to integrating test automation, database and performance testing, to complement existing testing practices. The service ensures quality is considered from the earliest point and across the entire SDLC.

SERVICE FEATURES

- Full service, from initial scoping to delivery and ongoing support
- Continuous Testing, supports Continuous Integration/Continuous Delivery pipelines
- Engages all stakeholders, including non-technical resources, using collaborative techniques
- Pre-built test automation frameworks or bespoke automation frameworks
- Unit test automation solutions, working alongside developers
- Implementation of API test automation across a range of protocols
- GUI test automation across platforms and user interfaces
- Test data and test environment configuration (via infrastructure as code)
- Integrate continuous performance testing into delivery pipeline
- Exploratory testing exercise to complement automated testing

SERVICE BENEFITS

- Reduce manual testing effort – 70% reductions achieved for clients
- Improve coverage and speed – double coverage and deliver 25x faster
- Increase delivery of projects, organisational and IT change
- Save thousands in licence costs, through open-source approach
- Go to market quicker, whilst reducing risk of issues
- Reduced complexity of environments during early stages of the SDLC
- Continuous testing to support your CI/CD/DevOps pipelines
- Easily maintainable with re-usability of technical test assets and components
- Commercial models to support test automation return on investment
- Select appropriate tools to automate technical testing tasks

ABOUT ROQ

Roq is an independent, outcomes focused Quality Engineering consultancy. We give organisations the confidence to implement complex technology change through Quality Engineering, delivered by our brilliant people. By leveraging our comprehensive solutions, built upon our Q-Suite, a comprehensive collection of assets, AI and automation frameworks, and a consistent way of working, we keep focus on what truly matters to you.

Whether you are rolling out new platforms, modernising legacy technology, or delivering large-scale upgrades, we help you move at pace, without sacrificing quality. Partnering with us leaves your organisation in a better place for the future.

Our Quality Engineering solutions are tailored to build confidence into your technology delivery, no matter your sector. With proven expertise, innovative approaches, and deep industry insights, we ensure your technology consistently delivers exceptional performance and outstanding user experiences.

OUR VALUES

Straight Talking: We say it how it is, using open, honest and direct communication. You'll always have full visibility on progress, with clear, candid insights and independent guidance, so you are empowered to make informed decisions.

Excellence: We leverage our expertise to drive efficiency and deliver the best outcomes, maximising value for you at every step.

Passionate: We care about what we do. We're motivated by proactively identifying risks throughout the lifecycle, to help you prevent issues before they arise and stopping them from recurring.

Commitment: We see it through, and we deliver on our promises whilst surpassing expectations. You can be confident that we're committed to making measurable improvements that leave a lasting impact. We'll work closely with your team and implement sustainable practices to ensure long-term success.
