Partner with the Exadata optimization specialists for a compelling OD@AZURE business case

Break free from legacy
licensing with optimized
ODB cloud licensing

Accelerate ODB
implementation and
migrations

Benefit from a best
practice ODB@Azure
architecture design

Start with a funded
Oracle migration
assessment

Partner with Cintra for an optimal Oracle to Exadata@AZURE migration business case and migration experience.

1 Assess

Start with our accelerated Oracle migration assessment to establish a business case including a technical and commercial roadmap. Based on a zero-risk agentless discovery process, we assess your Oracle database workloads using precision database optimization with our Remapped.ai assessment solution, delivering a complete migration business case in less than a month.

2 Migrate

Fixed fee Oracle mobilization and migration services provide a best practice OD@Azure architecture, including a framework for security, monitoring and backups. Migration readiness is achieved with proven migration runbooks to complete dry run migrations. Production migrations are executed with risk mitigation to ensure a minimal downtime migration for the highest degree of minimal business impact.

3 Optimize

AutoScale.IQ CPU scaling engine optimizes Oracle OD@Azure workloads with real-time CPU auto scaling for up to 60% savings in Oracle OCI cloud costs. AutoScale.IQ enables the adoption of cost-efficient cloud licensing. The solution includes scaling event reporting and consumption forecasting. Autoscale ensures workloads have CPU resources when needed and resources scaled down when not needed.
