

Oracle Legacy Support

Without doubt one of the most common issues organizations tell us they are suffering from is being hamstrung by technical and commercial debt. They feel tied into expensive, low value and rarely utilized support contracts and feel they have no alternative unless they place the business at risk. Businesses don't choose to fall behind, but many do due to budgetary and time constraints or their ever-shifting priorities and now feel stuck and with limited options.

Cintra's Legacy support program was designed specifically to help organizations break free from these shackles, improve support investment value, and free up budgets and funding to facilitate modernization and innovation to ensure they are no longer falling behind their competitors.

Maximize the potential of your legacy Oracle systems
