

Assess

Many organizations have difficulty quickly assessing their legacy technology platforms for modernization. They feel locked into vendors, are burdened by technical and commercial debt, and find it challenging to fully understand their modernization potential.

Cintra provide a zero impact, highly detailed, accurate, rapid, and deep discovery of current environments, which are critical to producing the credible technical and commercial roadmaps you need to help you achieve your modernization objectives and potential.

Understand how to achieve complete freedom from current vendor lock-in, technical and commercial debt and how to realize your potential modernized future state after technical, commercial, and licensing optimization / right-sizing.

Discover, assess, optimize and plan with confidence

- **Understand your current and potential future state** - Assess provides you with a true understanding of your options with our unique discovery tooling and future state modelling.
- **Optimize your licensing costs** - Our license optimization expertise streamlines agreements, cuts costs, and ensures compliance.
- **Modernize and transform with confidence** - With Assess, discover how migrating from legacy to modern platforms like AWS boosts scalability and cuts costs.
- **Strategic guidance for successful outcomes** - Our consultants provide strategic advice to align your Oracle workloads with business goals.
- **Compliance and audit defense** - Our Oracle License Catalyst Assessment helps ensure compliance and audit protection.
- **Holistic approach built around you** - Assess considers your unique needs, offering comprehensive evaluations and custom recommendations.

Frequently asked questions

Q: How can Assess help me optimize my Oracle workloads?

A: Our Assess solution offers comprehensive evaluations of your Oracle workloads, identifying areas for optimization and providing strategic recommendations to enhance performance, scalability, and cost-efficiency.

Q: Is the Assess solution suitable for cloud migrations?

A: Absolutely! Assess is specifically designed to support cloud migrations, providing insights into the viability, benefits, and roadmap for migrating your Oracle workloads to the cloud.

Q: Can Assess help with license compliance and audit defense?

A: Yes, our Oracle License Catalyst Assessment within Assess helps ensure compliance with licensing agreements, minimize financial risks, and prepare your organization for any audits or compliance challenges.
