Moodle Audit

At SkillSet, we provide structured platform performance and security audits to help organisations understand the health, risks, and effectiveness of their Moodle environment.

The audit assesses platform performance, configuration, user experience, permissions, integrations, and security. Findings are presented with clear, prioritised recommendations to support immediate improvements and longer-term platform planning.

Audit scope at a glance:

- performance and stability.
- configuration and versioning.
- permissions and access controls.
- plugins and integrations.
- learner and administrator experience.

What our clients say:

"SkillSet have been a dream to work with. Their project management is watertight, and their solution-focused helpfulness and flexibility has hugely contributed to a smooth and successful project delivery."

Pricing

SkillSet's Moodle Platform Performance and Security Audit services are delivered using a clear, transparent day-rate model.

Our consultancy **day rate is £575**, exclusive of VAT. A standard consultancy day is based on 8 hours, with delivery available on a full-day or half-day (4-hour) basis depending on the scope and nature of the engagement.

Before delivery begins, we work closely with you to agree objectives, assumptions, dependencies, and acceptance criteria. This ensures the audit is focused on the areas that matter most to your organisation and that costs remain predictable and controlled.

Any changes to agreed scope are managed through formal change control.

A typical Moodle audit engagement is completed over **one to three consultancy days**, depending on the size, complexity, and configuration of your platform, as well as the areas of focus agreed at the outset.

Audits can be delivered remotely or on site, depending on your requirements. Travel expenses are only applied for on-site sessions and are agreed in advance.

Where further support is required following the audit, follow-on consultancy, training, or remediation activity can be provided as a separate engagement.

What's Included?

Each Moodle Platform Performance and Security Audit can include the following core activities, designed to provide clear insight with minimal disruption.

Scoping and Discovery

We confirm objectives, scope, and priorities. This includes agreeing which areas of the platform to review, access requirements, and any known concerns, ensuring the audit focuses on the most relevant risks and performance issues.

Platform and Configuration Review

We review site configuration, versioning, hosting setup, and system settings to assess performance, stability, usability, scalability, and alignment with Moodle best practice.

Security and Permissions Assessment

We assess user roles, permissions, authentication methods, and access controls to identify potential security risks, and governance issues.

Plugins and Integrations Review

We review installed plugins and integrations to assess suitability, support status, configuration, and potential impact on performance or security.

Audit Report and Walkthrough

We provide a written audit report with clear, actionable recommendations, followed by a walkthrough session to explain findings and to answer questions.

What's Not Included?

The following items fall outside the standard audit unless specified in the project scope:

- hands-on technical implementation (e.g. configuration or uploads).
- plugin development, integrations, or system customisation.
- customisation of themes, branding, or user interface design.
- remediation work or implementation of audit recommendations.
- penetration testing beyond configuration and permissions review.

Find out more about our implementation in our [Moodle Learning Management System Development, Hosting, Maintenance, and Optional Support G-Cloud 15 listing](#).

Service Delivery Approach

SkillSet audits typically follows a three-phase structure:

1

Discovery

Understanding objectives, constraints, and current learning ecosystem.

2

Analysis

Reviewing data, systems, workflows, and learner feedback to identify gaps and opportunities.

3

Recommendations

Presenting clear, evidence-backed guidance with prioritised next steps.

About SkillSet

SkillSet is a UK-based learning technology provider with more than 30 years' experience delivering learning solutions across the public and private sectors.

We are ISO 27001, ISO 9001, and Cyber Essentials Plus certified, demonstrating our commitment to information security and quality management. We are also an AWS Partner, ensuring our services are delivered securely and in line with recognised industry standards.

SkillSet works closely with clients to create engaging, accessible, and measurable learning experiences that meet compliance, safety, and professional development needs.

We strive to develop long-lasting partnerships – that's why we've worked with clients for more than 25 years. Our customer satisfaction consistently exceeds 90%, reflecting our commitment to quality, responsiveness, and long-term client partnerships.

What our clients say:

"The commitment shown by SkillSet to getting the project over the line, even when it turned out to be more complex than anticipated, was really appreciated and reinforced the reasons why we chose SkillSet as a long-term partner for this work. I really felt like there was a commitment that went beyond customer/supplier."

Our G-Cloud 15 Services

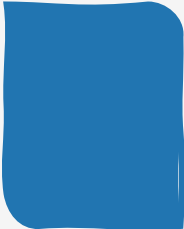

SkillSet provides a range of learning and technology services through the G-Cloud framework.

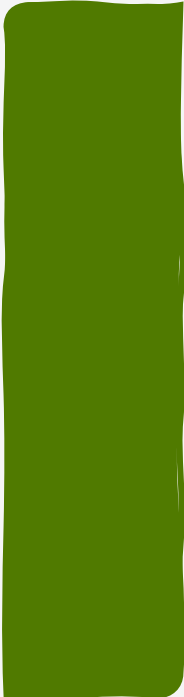

Learning and Development Consultancy Services – practical, experience-led consultancy to support learning strategy, discovery, and programme design.

Bespoke eLearning – custom-designed digital learning built around your goals, people, and real-world working practices.

Tailored Off-the-Shelf eLearning Courses – ready-made courses, covering compliance, health and safety, and business skills, with the flexibility to tailor content, branding, and scenarios to your organisation.

Moodle Learning Management System (LMS) Development, Hosting, Maintenance, and Optional Support – secure, scalable Moodle solutions configured and supported to fit your organisation and learners.

Custom Moodle Plugin Development – custom plugins and integrations that extend Moodle’s functionality and support specific organisational needs.

Moodle Platform Performance and Security Audit – structured audits that provide clear insight into platform performance, configuration, and security, with prioritised recommendations.
