Moodle Plugins

At SkillSet, we develop custom Moodle plugins that extend and enhance your learning platform.

Our development service enables organisations to tailor Moodle to their specific workflows, automate administrative processes, improve reporting, and integrate seamlessly with external systems such as HR, CRM, and payment platforms.

Every plugin is built by experienced Moodle specialists who follow Moodle's development and security standards, ensuring that the code is robust and maintainable. Whether you need new functionality, an integration, or improvements to an existing plugin, we deliver solutions that fit your environment.

Our goal is simple: to help organisations get more from Moodle by creating functionality that improves user experience, reduces administration, and supports long-term platform scalability.

What our clients say:

"SkillSet have been a dream to work with. Their project management is watertight, and their solution-focused helpfulness and flexibility has hugely contributed to a smooth and successful project delivery."

Pricing

Moodle plugin development is priced using transparent day rates, based on the skills and effort needed to satisfy the requirements. Pricing is structured to provide predictability, flexibility, and clear scope.

Day Rates by Role

Project Management	£650
Developer	£575
Systems Tester	£500

Pricing is based on clearly defined deliverables. Before development begins, we will work with you to agree scope, assumptions, dependencies, test plans, and acceptance criteria, ensuring costs are predictable and controlled.

Pricing typically reflects:

Functional and
technical
complexity.

Integration and data
requirements.

Testing and
deployment
environments.

Where requirements are well defined, the price can be fixed. Discovery-led or iterative work can be delivered using agreed budgets to maintain cost control. Any changes to scope are managed through formal change control.

Support Credits

Our credits provide a simple and cost-effective way to maintain, update, and extend your plugins over time.

Credits are purchased in **full-day blocks (8 hours) at £575 per day**, and can be used in hourly increments as needed.

Support credits are valid for 12 months from the date of purchase.

What's Included

Each plugin development project includes everything needed to deliver a secure, high-quality, production-ready Moodle enhancement:

Requirements Gathering and Solution Design

We work with your team to define the functional requirements, user journeys, data needs, and integration points.

Custom Plugin Development

Our developers build plugins aligned to Moodle's official coding standards and security guidelines.

Testing and Quality Assurance

Every plugin undergoes functional and user acceptance testing to ensure reliability and a smooth user experience.

Documentation and Version Control

We write clear documentation and manage all development within version control, supporting efficient future updates.

Deployment Support

We assist with installation in both test and live environments, ensuring the plugin is deployed effectively and performs as expected.

What our clients say:

"I am delighted with the whole process from start to finish. SkillSet are easy to work with, reliable and super responsive."

What's Not Included

Unless requested and scoped specifically, the following items are not included:

- long-term plugin maintenance or support (credits purchased separately).
- integration with unsupported or deprecated systems.
- custom theme or user interface design.
- end user training.
- UX research or accessibility audit beyond core development practices.

Examples

SkillSet can design, develop, or enhance Moodle plugins of any type, supporting the extension and adaption of Moodle to meet even the most complex requirements. Common areas of plugin development include:

Themes

Control the look and feel of your platform, aligning layout, branding, and navigation with your organisation's identity.

Integrations

Connect Moodle with third-party systems such as HR platforms, CRM tools, payment portals, identity providers, or reporting systems.

Activities

New types of learning interaction or assessment, tailored to specific learning, compliance, or operational requirements.

Blocks

Configurable content or functionality such as dashboards, alerts, or contextual information for learners and administrators.

Pages

Used for additional functionality outside of courses, including funding, CPD, PDP, etc.

Reporting

Tailored reports, dashboards, or exports to support monitoring, compliance, and decision-making.

Service Delivery Approach

We follow a structured delivery approach based on the ADDIE methodology (Analyse, Design, Develop, Implement, Evaluate).

1

Analysis

Engagement begins with structured discovery to understand your business objectives and technical environment. This includes reviewing existing plugins, integrations, data flows, and hosting arrangements to ensure requirements are clearly defined, realistic, and achievable.

2

Design

We produce a technical design aligned to Moodle's plugin framework and security standards. This defines structure, permissions, data handling, and integration methods, ensuring solutions are maintainable and compatible with supported Moodle versions.

3

Develop

Development is carried out by Moodle specialists using established coding standards and version control. Progress is reviewed at agreed milestones, allowing early validation and reducing the risk of late-stage changes.

4

Implement

Plugins undergo functional, and compatibility testing, followed by support for user acceptance testing within a staging environment. Any issues identified are resolved prior to release, ensuring the solution is robust and ready for use.

5

Evaluate

We review outcomes against the original objectives to evaluate project process and inform future enhancements.

Our Plugin Library

SkillSet has delivered a wide range of custom Moodle plugins for public and private sector clients, including:

Webinar Management

Unifies bookings, attendance tracking, and session management across Teams, Zoom, and Webex.

Webinar - Book a session

This webinar will provide you with the fundamentals on GDPR in the workplace.

[Back to course](#)

Date 9 November 2024
Time 1:05 PM - 2:05 PM

Information This session will go over the fundamentals of GDPR. Please join 5 minutes before the start time.

[Book session](#)

Date 20 December 2024
Time 9:25 AM - 12:25 PM

Information This session will go over the fundamentals of GDPR. Please join 5 minutes before the start time.

[Book session](#)

Date 11 January 2025
Time 1:00 PM - 2:30 PM

Information This session will go over the fundamentals of GDPR. Please join 5 minutes before the start time.

Courses

This section will allow you to directly add courses from our directory. By adding courses to this page, you are filling out your PDP. Your development is ongoing and we recommend you review your PDP every six months. You can add courses to this page at any time. Once you have listed your courses, please use the funding application tool on this site to create a new funding application, making sure that the courses on your funding application are also on this PDP. Please note that once your application has been approved you will not be able to apply for a different course, so please contact your training provider prior to completing the application form.

[ADD INDIVIDUAL LEARNING ACTIVITY](#)

Accredited Courses

This is your space to upload any accredited learning courses that you have completed outside of the CPD programme.

Name of Activity	Description of Activity	Supplier name	Date of activity	Activity type	Actions
Advanced Project Management Techniques	A comprehensive course covering project management methodologies, risk assessment, and leadership skills tailored for large-scale projects.	Project Management Institute	15-06-2024	Accredited Learning	OO

Record of CPD Programme

This is a record of all the e-learning courses that you have completed, including the current Record of Learning programme. This data is automatically populated for you, you cannot edit it.

Name of Activity	Description of Activity	Supplier name	Date of activity	Activity type	Actions
There are no records in this report.					

Other

This is your space to upload any non-accredited courses that you have completed outside of the CPD Programme.

Name of Activity	Description of Activity	Supplier name	Date of activity	Activity type	Actions
Leadership & Team Dynamics Webinar	A webinar focusing on leadership strategies and how to enhance team collaboration and dynamics in a remote working environment.	Leadership Skills Network	20-09-2024		OO

Manager Dashboard

Provides managers with visibility of team learning progress.

Benchmarking

Allows teachers to import and compare classroom performance data.

Group Booking & Payment

Allows managers to bulk-enrol staff and handle payments centrally.

Custom Notifications

Configurable messaging workflows for email notifications.

About SkillSet

SkillSet is a UK-based learning technology provider with more than 30 years' experience delivering learning solutions across the public and private sectors.

We are ISO 27001, ISO 9001, and Cyber Essentials Plus certified, demonstrating our commitment to information security and quality management. We are also an AWS Partner, ensuring our services are delivered securely and in line with recognised industry standards.

SkillSet works closely with clients to create engaging, accessible, and measurable learning experiences that meet compliance, safety, and professional development needs.

We strive to develop long-lasting partnerships – that's why we've worked with clients for more than 25 years. Our customer satisfaction consistently exceeds 90%, reflecting our commitment to quality, responsiveness, and long-term client partnerships.

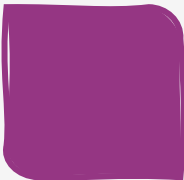

What our clients say:

"The commitment shown by SkillSet to getting the project over the line, even when it turned out to be more complex than anticipated, was really appreciated and reinforced the reasons why we chose SkillSet as a long-term partner for this work. I really felt like there was a commitment that went beyond customer/supplier."

Our G-Cloud 15 Services

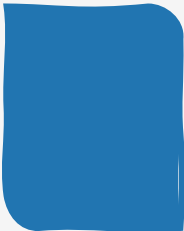

SkillSet provides a range of learning and technology services through the G-Cloud framework.

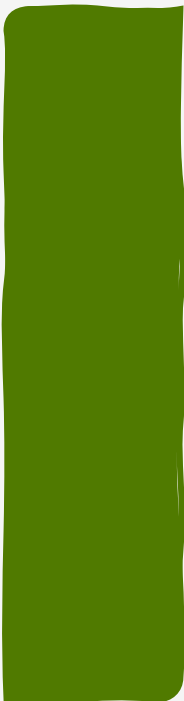

Learning and Development Consultancy Services – practical, experience-led consultancy to support learning strategy, discovery, and programme design.

Bespoke eLearning – custom-designed digital learning built around your goals, people, and real-world working practices.

Tailored Off-the-Shelf eLearning Courses – ready-made courses, covering compliance, health and safety, and business skills, with the flexibility to tailor content, branding, and scenarios to your organisation.

Moodle Learning Management System (LMS) Development, Hosting, Maintenance, and Optional Support – secure, scalable Moodle solutions configured and supported to fit your organisation and learners.

Custom Moodle Plugin Development – custom plugins and integrations that extend Moodle’s functionality and support specific organisational needs.

Moodle Platform Performance and Security Audit – structured audits that provide clear insight into platform performance, configuration, and security, with prioritised recommendations.

Search our G-Cloud listings to explore our services and find out more.
