

Moata Carbon Portal

Mott MacDonald's carbon monitoring solution for the built environment, enabling a net zero future

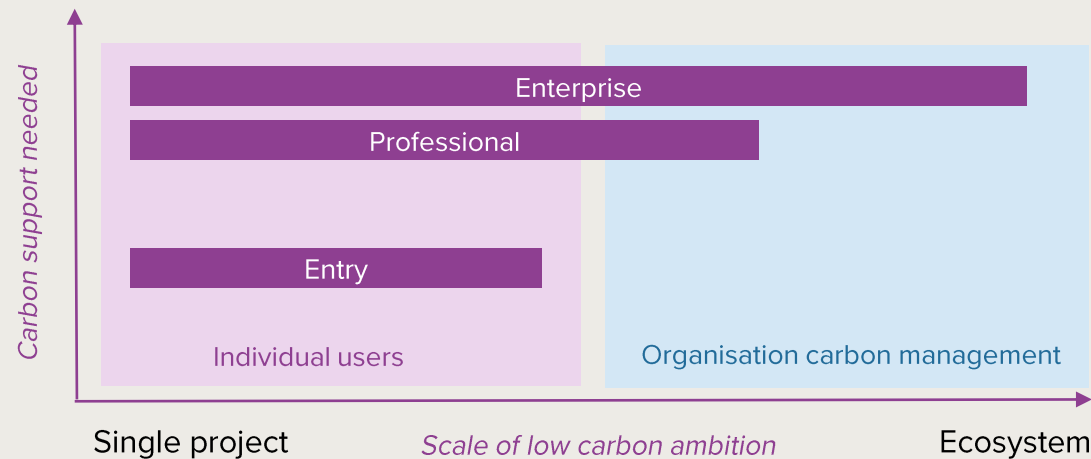

Pricing

Moata Carbon Portal has 3 pricing tiers based on the level of functionality, number of users and carbon libraries, and the scale of carbon management support.

As you grow in their carbon maturity, more domain expertise is required to support your low carbon journey. This pricing model reflects these needs, with clear additional value provided at each tier.

The curated pricing tiers ensure that you are provided with the most appropriate MCP solution for your needs.

Below: A visual representation of each pricing tier against a client’s low carbon needs

Below: Features summary of the 3 pricing tiers
