

WPC Core-Vet Pricing

WPC Core-Vet - Vetting Management System from WPC Software Ltd.

Product Outline

WPC Core-Vet provides vetting management capabilities for organisations required to undertake vetting work. For accurate prices, customers will choose the relevant licence band in Section 1. Section 1.a. includes Licencing for the main WPC Core-Vet system. Section 1.b. includes licensing for the WPC Core-Vet Web Forms. Customers can choose whether they require both of these elements, or if they only want the Web Forms module to supplement an on-premises WPC Core-Vet installation.

Other compulsory items are in Section 2 (including implementation fees and hosting options). Also, please add any optional items required in Section 3. The prices below are for a single organisation procuring WPC Core-Vet.

The licensing model for WPC Core-Vet is based on the size of the force. The overall licensing cost is split into bands based on the overall size of the force or organisation. The correct band is dependent on functionality and options required.

Section 1 – Annual Licences

Section 1.A – Main Application			
Force/ Organisation size	Total number of staff in organisation (up to)	Monthly Fee for main WPC Core-Vet System	Conditions
Very Small	2300	£940 - £1145	1. From the point of cancellation or non-payment the licence is no longer valid.
Small	3300	£1040 - £1405	1. From the point of cancellation or non-payment the licence is no longer valid.
Medium	4300	£1250 - £1060	1. From the point of cancellation or non-payment the licence is no longer valid.
Large	6500	£1405 - £1770	1. From the point of cancellation or non-payment the licence is no longer valid.
Very Large	15000	£1615 - £2500	1. From the point of cancellation or non-payment the licence is no longer valid.
1.B WPC Core-Vet Web Forms Application Module	£470 per month Licence Fee WPC Core-Vet has a Web-Forms Application module. Some forces take this to supplement their locally hosted implementation, and others will partner this module with the full WPC Core-Vet system. More information about the Web-Forms module is outlined in the service definition. This cost is in addition to the licence for the overall system outlined in Section 1.a above. However, the Web Forms and associated hosting (see Table 2 below) can be taken as a stand-alone SaaS service to supplement an “on-premises” WPC Core-Vet.		

Section 2 – Fixed Rate Items

2.a. Standard Implementation Package	£9,000 - £10,500 one-off for a single force	Price dependant on size of organisation and exact services required. Includes: - Installations activity - System configuration consultancy - Project management and administration - A one-day training course for up to 10 people at your premises - Expenses for the above are included (within UK) The implementation package can be tweaked depending on customer requirements. It does not include Back Record Conversions from legacy systems, which can be quoted for at the daily rate below.
2.b. Standard Cloud Software Managed Hosted Service For the Main WPC Core-Vet Application	£750 per month per individual force	This covers the default managed hosted service provided via Microsoft Azure and as defined in the Service Definition document.
2.c. Standard Cloud software Management Hosted for the Core-Vet Web-Forms Module	£605 per month per individual force	This covers the default managed hosted service provided via Microsoft Azure and as defined in the Service Definition document. This is in addition to the hosting cost for the main Core-Vet Application.

Section 3 – Optional Items

3.a. Additional Software Training Services	£1,100	Per One Day Course. With a minimum of 5 and maximum of 10 attendees.	Providing user and administrator training. Dependant on the number of attendees and requirements of the customer this can be held at WPC HQ or on-site. Price quoted excludes travel expenses.
3.b. Additional Required Software Services	£1,100	Per day per person, company standard rate for additional consultancy days. For activities outside the scope of the initial purchase, such as providing changes to the system, or back record conversion/data migration services from legacy systems.	
3.c. Address Interface	£1,200 per annum	The Core-Vet solution has the ability to link to an online address lookup solution. This price is per 13,500 look ups per annum.	

Notes

- For specific details of the standard package as part of our SaaS offering, please see the Service Definition. Alternative specifications, resiliency options, back-up processes and access methods are available in addition to or in place of the standard.
