

WPC Registrars Pricing

WPC Registrars Solution from WPC Software Ltd.

Product Outline

WPC Registrars is a registration management solution that efficiently manages appointments, scheduling, venues, certificate requests, ceremonies, citizenships, stock management, and more. The product licence includes all areas

To obtain a full cost for the solution, customers will need to select the relevant Licence band in section A, add the fixed rate item from section B, and add any optional extras in section C. The product licence includes hosting of the solution. The customer price within the range is dependent on size of area and exact services required.

The licensing model for WPC Registrars is based on an unlimited number of users. The overall licence cost is split into bands based on the overall population of registration area.

Standard Items

The pricing below is based on our standard offering. Please see our service definition for more information. This covers the default managed hosted service provided via Microsoft Azure and as defined in the Service Definition document.
