Our Capabilities

Your organisation needs a technology partner with a proven track record you can trust. IJYI has more than 10 years' experience providing well-supported solutions to organisations of all sizes.

We deliver expert-led technology solutions that drive efficiency, growth and smarter decision-making. As Microsoft Partners and AWS experts, we specialise in AI, cloud, and data-driven solutions.

Software Delivery

We build software that solves problems, improves efficiency and drives growth — always with cost-effectiveness in mind. Our agile, collaborative approach ensures tailored solutions are delivered on time and on budget.

Data Intelligence

Our Data Analytics Platform Accelerator helps businesses quickly design and build secure, best-practice data platforms in Microsoft Azure. This enables organisations to overcome data challenges and gain powerful insights that drive smarter decisions.

Support

Our Managed Support Service ensures your infrastructure and applications remain productive, secure and high-performing. We support both business-critical platforms and important non-critical systems, with flexible SLAs and packages tailored to each system's importance.

Our G-Cloud Services

- Azure Artificial Intelligence (AI) and Machine Learning (ML) Support
- Cloud Application Management (Private, Hybrid & Public Azure/AWS)
- Cloud AWS/Azure Migration Planning, Infrastructure, Applications, Data & Services
- Cloud AWS/Azure Setup & Migration: Infrastructure, Applications, Data & Services
- Cloud Financial Management Services (FinOps)
- Cloud, Data or DevOps Centre of Excellence
- Continuous Technical Improvement (CTI) Assessment
- Managed Amazon Web Services AWS IaaS, PaaS & SaaS Cloud
- Managed Hybrid Cloud (Private, AWS and/or Azure)
- Managed Microsoft Azure Public IaaS, PaaS & SaaS Cloud
- Microsoft Azure Cloud Data Platform Support
- Vulnerability, Penetration & Cyber Security Testing

Examples of our Public Sector Experience

Maritime &
Coastguard
Agency

Creation of Analytically Ready Data for its Data Analysts & Scientists to drive operational efficiency.

Extending existing Microsoft Azure data ingestion platform to incorporate additional data feeds, including real-time streaming sources for automatic ship tracking data.

More details can be found on our website.

Suffolk
County Council

Our Long-Term Partnership with Suffolk County Council has covered all our capabilities and services across a range of departments, including Education, Public Health and Growth, Highways & Infrastructure.

We have delivered new cloud native applications, data analytics, visualisations and an ongoing support service. More details can be found on our website.

Essex County Council

The Prototype Electronic Homecare Monitoring Application was previously built by a 3rd party as a PoC. We have refactored the application, led the connectivity of the initial care provider platforms, and now have the solution under our support service.

Looking ahead, this service will add additional providers and help ECC ensure homecare standards are being maintained.

Service Definition

Cloud Financial Management
Services (FinOps)

IJYI provides cloud financial management services to help public sector organisations understand, control and optimise cloud spend across Azure and AWS. The service supports ongoing cost visibility, optimisation and governance activities. Delivery is provided by UK-based specialists and aligned to agreed reporting and engagement requirements.

Service Features

- Cloud cost analysis across Azure and AWS platforms
- Identification of inefficiencies and cost optimisation opportunities
- Ongoing monitoring of cloud usage and spend
- Cost reporting and financial transparency dashboards
- Recommendations aligned to cloud best practice frameworks
- Support for budgeting, forecasting and cost governance
- Regular cost optimisation reviews and reporting
- Integration with existing financial and operational processes
- Business hours and optional extended support coverage
- Optional add-on services supporting broader cloud optimisation

Service Benefits

- Improved visibility and control of cloud expenditure
- Reduced unnecessary cloud costs and wastage
- Better alignment between cloud spend and business needs
- Improved forecasting and budget management
- Ongoing optimisation rather than one-off cost reviews
- Increased confidence in cloud financial governance
- Reduced financial risk from unmanaged cloud growth
- Improved decision-making through clear cost insights
- Access to experienced UK-based cloud cost specialists
- Focus internal teams on value-driven cloud usage

The IJYI Process

Your organisation needs a technology partner with a proven track record you can trust. IJYI has more than 10 years' experience providing well-supported solutions to businesses of all sizes.

We deliver expert-led technology solutions that drive efficiency, growth and smarter decision-making. As Microsoft Partners and AWS experts, we specialise in AI, cloud, and data-driven solutions, helping organisations optimise costs, manage risk, and stay ahead of the competition.

ISO 9001 registered and Cyber Essentials certified, we are committed to excellence and industry best practices to ensure your project is delivered on time and within budget.

How We Work

Working in close collaboration with our clients, IJYI develops robust solutions to drive long-term growth and enable smarter business decisions.
