

Security Testing Overview

The Service

Implementing security testing for your organisation is crucial to protect sensitive data, comply with regulations, build trust with customers, avoid costly downtime, and maintain a good reputation. Regularly conducting MTI's security testing helps identify and address vulnerabilities in your company's systems and infrastructure, which prevents cyber-attacks and data breaches. With a comprehensive plan to manage and mitigate risks, we can provide peace of mind and ensure the security of your organisation's sensitive information.

Outcomes & Benefits

Our security testing services is a valuable tool for enhancing your organisation's security posture. It can deliver many outcomes including:

- We can identify vulnerabilities and weaknesses in your company's security infrastructure. This information can be used to mitigate risk, reduce the likelihood of a security breach, and protect sensitive information.
- With our specialised expertise we can provide you access to comprehensive testing services that will ensure all aspects of your organisations IT infrastructure are thoroughly tested, from application security to network vulnerabilities.
- Conducting security testing will assist your company in meeting compliance requirements, giving you peace of mind that you are operating within regulatory guidelines.

Why MTI?

With MTI, you can rest easy knowing that our extensive experience in conducting penetration testing on both internal and internet-facing infrastructure will provide you with the best possible protection against cyber threats. As a lifelong member of global cyber security body, CREST, we have developed a deep understanding of the tactics employed by malicious users to infiltrate corporate networks, allowing us to identify and mitigate any risks to your business. And, if required, our professional services team can swiftly and effectively implement remediation measures to ensure your organisation is fully protected. Whether your infrastructure is on-premises or in the cloud, MTI's expertise is at your service to keep your business safe and secure.

// The consultants who conducted the penetration testing services in our organisation were not only respectful but also an absolute delight to work with. Their exceptional professionalism made my job extremely easy, and I couldn't have asked for better service. They delivered the results within the expected timeframe and exceeded our expectations. If we require any further penetration testing, it would be our pleasure to work with them again.
